Appendix 6: Project Phases.....	127
Appendix 7: Programmers and Implementers	128

Introduction

Metropolitan Chicago's comprehensive regional plan, [GO TO 2040](#), was adopted in 2010 and updated in October 2014. The [Regional Mobility](#) chapter of the plan addresses the long-range needs of the region for maintaining, modernizing, and expanding its transportation system.

This report identifies obligations or awards of project phases that occurred in Federal Fiscal Year (FFY) 2015 (October 1, 2014 to September 30, 2015) in the CMAP region. This report builds on federally-mandated reporting requirements set out in [23 CFR 450.334](#).

Obligations are part of the process for projects that use Federal Department of Transportation funds. An obligation occurs when federal authorization, a commitment to financially participate in a project or phase of a project by Federal Highway Administration (FHWA) or Federal Transit Administration (FTA), is secured. Once the authorization is made, the available funds are assigned to the project for reimbursement; this assignment is the actual obligation.

The obligation process used by Illinois Department of Transportation (IDOT) for FHWA funds makes extensive use of advance construction (AC) (see [Appendix 2](#) for more information) as a financial tool for projects using FHWA funds. This report treats project phases that have federal obligations or have been authorized in advance construction the same, with both being considered an obligation.

Obligations are also used for transit projects. A Federal Transit Administration (FTA) obligation is a grant agreement between a project sponsor and the FTA, often for a specific funding type and for all project phases together.

An award occurs when a construction bid is opened, a construction contractor or engineering consultant has been selected, and a contract has been executed. For state or locally funded projects, "award" is synonymous with "obligation" in this report.

In the CMAP region, billions of dollars are spent on transportation infrastructure annually. While a considerable portion of that amount is federal or state funds, counties, municipalities, and townships also spend their own (locally derived) funds on transportation infrastructure. CMAP makes an effort to collect this information, which goes beyond the requirement to report only FHWA, FTA, and major capital project obligations and awards, and include it in this report. Information in this report is from Federal, State and local obligations and awards used for transportation infrastructure projects (see [Appendix 1](#) for more detail).

Information for locally funded project phases are derived from a variety of sources. Municipal information is from a municipal survey CMAP conducted in 2016. Municipalities were asked how much local funding they spent on projects that utilized only local funds. Township data is based on Motor Fuel Tax (MFT) distribution from IDOT to townships as reported in IDOT's 2015 For the Record report. Information for counties is provided by the counties to CMAP or is found in publically accessible budgets or county board actions.

CMAP also works with local transit agencies, including the Chicago Transit Authority (CTA), Metra, Pace, and the Regional Transportation Authority (RTA), to capture how much local funding they award annually for capital transit projects that do not utilize federal or state funding.

In addition to summaries, this report includes a list of project phases that counties and transit agencies accomplished using only local funds. Those phases are included in the list of non-federally funded road projects and the list of transit projects. However, determining the list of project phases accomplished by municipalities and townships using only local funds was not possible.

The project phases represented in this report are all located within the CMAP region, which consists of Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will Counties and portions of DeKalb and Grundy Counties. The region is also divided geographically by [Council of Mayors](#) boundaries. Each [municipality](#) in the region belongs to, and is categorized within, a council. In this report, these boundaries are used to summarize and compare data across the region.

CMAP also classifies projects into one of three categories: maintenance, modernization, or expansion. Each project's classification is based on its [project type \(pg. 35\)](#) and [work types](#) reported by the implementing agency to describe the project in the Transportation Improvement Program (TIP).

CMAP collects both project type and work type data, and uses this information to demonstrate progress toward GO TO 2040 implementation. GO TO 2040 prioritizes the maintenance and modernization of the existing transportation system before its expansion and calls for an increased commitment to public transportation and investments to support livable communities.

The data in this report is available [electronically as a part of the TIP documentation](#). CMAP has also developed [numerous on-line tools](#) summarizing transportation programming data throughout the region.

This report is organized into the following sections:

- [Graphics](#) summarizing obligations and awards in a variety of categories.
- A list of [federally funded road projects](#), including bicycle/pedestrian projects.
- A list of [non-federally funded road projects](#). Regionally significant projects are included in this section.
- A list of [transit projects](#). This list includes non-federal and federally funded transit projects obligated/awarded in FFY 2015 in the CMAP region.
- A series of [appendices](#) that explain data sources and data summarizing techniques, as well as other information.

Summaries of Obligations and Awards

These summaries highlight capital transportation obligations and awards in the region and demonstrate their relationship to GO TO 2040. It is common for a transportation project to require anywhere from a few years to a decade or more to complete planning, design, and construction. As a result, some of the obligations/awards shown in this report reflect stages of planning, design, and construction that were already underway prior to the adoption of GO TO 2040 in October 2010. The summaries in this section reflect all obligations or awards incurred in FFY 2015, regardless of fund source.

Figure 1.

Obligations and awards by major funding category in FFY 2015

Source: Chicago Metropolitan Agency for Planning.

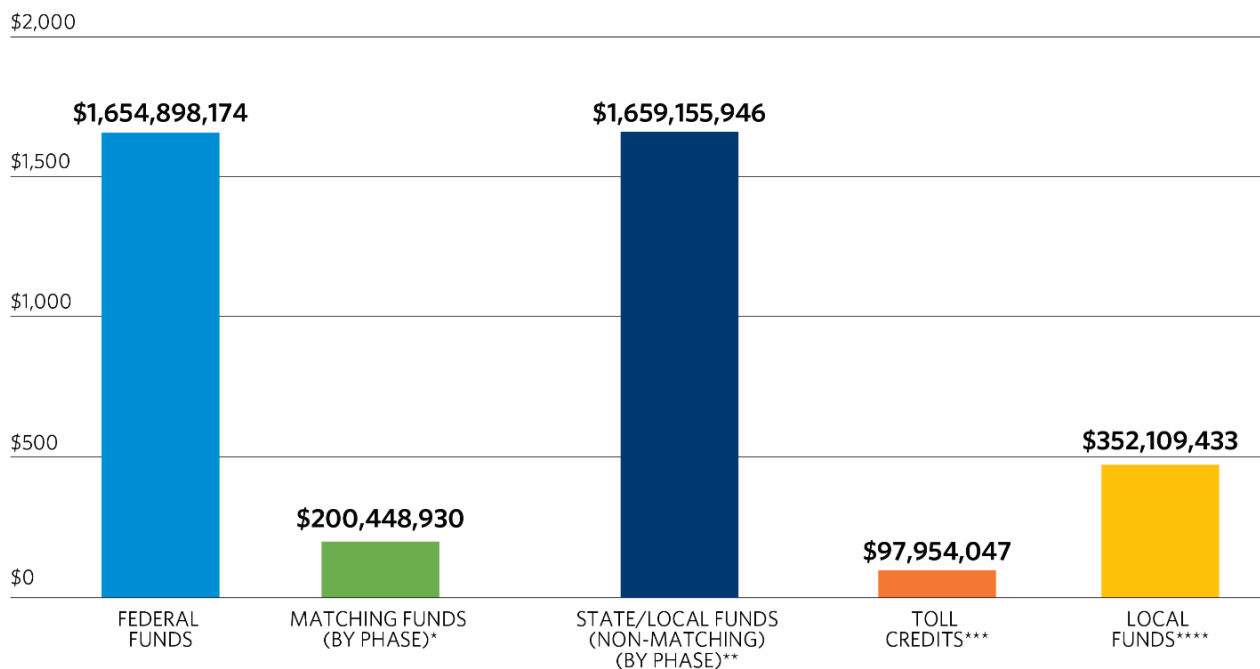

Note: Included in local funds are estimates of municipal and township obligations compiled by CMAP.

* Matching funds are state or local funds used in conjunction with federal funds.

** Non-Matching funds are in addition to matching funds or are funds used for a project phase that doesn't use federal funds, such as the Tollway funded projects.

*** Transportation development credits have no monetary value and are used as a mechanism to access federal funding.

**** Local funds are non-matching funds derived through local sources that are used by a local agency such as a County or Municipality.

- Total capital transportation obligations and awards in FFY 2015 were \$3,862,612,483.
- Federal funds typically cover a portion (often 80 percent) of project cost and require a funding match comprised of non-U.S. Department of Transportation (DOT) funds, usually state or local funding, or transportation development credits.
- Sixty percent of state/local funds (non-matching) are Illinois Tollway project phases.
- Non-federal funding is primarily from the State and does not have a matching requirement.

Figure 2.

Obligations and awards by major funding category in FFY 2015

Source: Chicago Metropolitan Agency for Planning.

- Construction and implementation account for 90 percent of the region’s obligations and awards in FFY 2015.
- Pre-construction/construction engineering phases are less expensive than construction and implementation.
- Right of Way Acquisition (ROW) accounted for less than 1 percent of all obligations and awards in FFY 2015.

Figure 3.

FFY 2015 obligations by FHWA fund source, in millions

Source: Chicago Metropolitan Agency for Planning.

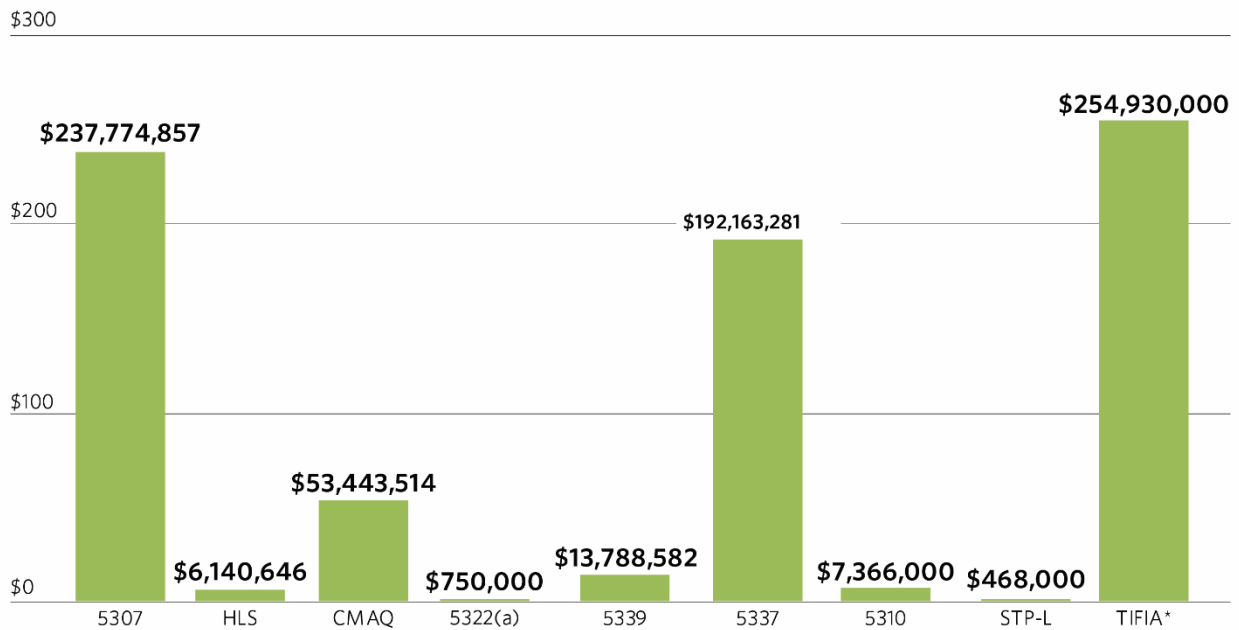

- FFY 2015 Federal Highway Administration (FHWA) obligations in the region totaled \$886,963,294.
- Three fund categories (CMAQ, NHPP, and STP-Locally Programmed) accounted for over 74 percent of all of the FHWA expenditures.
- Note: [Appendix 5](#) has more detailed information regarding the funding sources that are in the TIP, many of which had obligations or awards in FFY 2015.

Figure 4.

FFY 2015 obligations by FTA fund source
in millions

Source: Chicago Metropolitan Agency for Planning.

*TIFIA is a federal loan that is paid back.

- In FFY 2015, \$766,824,880 in Federal Transit Administration (FTA) funds were obligated.
- Three fund categories (5307, 5337, and CMAQ) accounted for over 94 percent of the non-TIFIA funding from the FTA in FFY 2015.
- TIFIA funds are a loan by the federal government paid back by the agency granted those funds.
- 5307 funds are used for capital improvements to the transit system.
- 5337 funds are formula funds used in achieving a state of good repair on the transit system.

- 5339 funds are formula funds used to improve Buses and Bus Facilities.
- Nearly all of these funds are allocated to the region based on federal funding formulas that primarily rely on the urbanized area population of the region.
- [Appendix 5](#) has detailed information regarding the various funding sources that are in the TIP, many of which had obligations or awards in FFY 2015.

Figure 5.

Locally-funded obligations and awards used for local projects only in FFY 2015

Source: Chicago Metropolitan Agency for Planning.

- In 2015, \$348,753,057 in local funds were spent on local road project phases.
- Transit project phases that used only local funds totaled \$125,192,903.
- Project phases that were funded only with local funds amounted to nearly \$474 million, or 9 percent of the total amount obligated or awarded in FFY 2015. This is over and above the amount of local funds used to match federal funds or in combination with state funds.

The region's long-range plan, GO TO 2040 recommends, "...a focus on maintaining the existing system first, and using most of our remaining resources to modernize the system." To reflect how GO TO 2040 is being implemented, projects are broadly placed into one of three general project categories, Maintenance, Modernization, or Expansion. While a project may have components associated with any or all three project categories, each project is only assigned to one project category as CMAP doesn't have enough information to accurately allocate a particular project's financial information among categories. The assignments are based on a hierarchy with expansion at the highest level, followed by modernization, then maintenance. Projects that fit into multiple categories are assigned to the highest category level. Thus, when a project that has an expansion component, all of the phases for that project are classified as expansion.

Figure 6.

**FFY 2015 obligations and awards
by project categories**

Road and transit project phases show significant differences in the project categories for FFY 2015 obligations and awards.

Figure 7.

FFY 2015 obligations and awards by project category for roads

Source: Chicago Metropolitan Agency for Planning.

- The expansion and reconstruction of the Elgin O’Hare Expressway (IL 390) and I-90 awarded \$931M in FFY 2015. This is 63 percent of all FFY 2015 Road project expansion obligations and awards.
- Over \$52 million was awarded for The Jane Byrne/Circle Interchange in FFY 2015. This project is primarily a modernization project; however, all of the funding is classified as expansion as there are some elements that are expansion. This indicates how the project classification hierarchy can affect the summary data.
- The I-55/Chinatown feeder ramp replacement was the largest modernization project obligated in FFY 2015 at just over \$120 million.

Figure 8.

FFY 2015 obligations and awards by project category for transit

Source: Chicago Metropolitan Agency for Planning.

- Transit expenditures were overwhelmingly for maintenance.
- Modernization of the Metra Union Pacific West tracks is one of the Major Capital Projects called for in GO TO 2040.
- Expansion was mainly one project, the I-90 Pace Park and Ride and bus on shoulder project.

In addition to the three broad categories shown in figures 5 through 7, projects and their associated phases are classified by project type. “Active Transportation” includes bicycle and pedestrian projects such as sidewalk improvements or bike paths. “Guideway Improvements” are rail line improvements, while “Other Transit” often consists of CTA bond payments.

Figure 9. FFY 2015 project type by maintenance, modernization, and expansion

	Expansion	Maintenance	Modernization
Roads & Bridges	\$1,485,284,816	\$536,675,346	\$534,506,394
Active Transportation	\$0	\$4,723,365	\$55,607,544
ADA Improvements	\$0	\$0	\$130,400
Safety	\$0	\$0	\$400,000
System Management/ITS	\$0	\$0	\$40,701,572
Freight	\$0	\$600,000	\$105,891,893
Other	\$200,000	\$3,822,338	\$27,484,446
Road Totals	\$1,485,484,816	\$545,821,049	\$764,722,249
Transit Line/Route Expansion	\$42,973,867	\$0	\$0
Transit Station/Stop Improvements	\$10,000,000	\$10,489,400	\$6,260,000
Guideway Improvements	\$0	\$95,460,572	\$45,000,000
Other Transit	\$0	\$170,787,063	\$0
Systems Improvements	\$0	\$0	\$56,907,802
Parking	\$0	\$900,000	\$0
Transit Equipment & Furnishings	\$0	\$17,000,000	\$279,987
Transit Operations	\$0	\$2,054,063	\$11,290,000
Transit Support Facilities	\$0	\$12,050,000	\$31,882,045
Transit Vehicles (Bus/Rail)	\$0	\$546,547,782	\$5,000,000
Transit Total	\$52,973,867	\$855,288,880	\$156,619,834

The following chart shows how the transit agencies and CDOT obligated funds by mode. The Other mode includes bond payments, computer upgrades, etc.

Figure 10.

FFY 2015 transit obligations and awards by mode

Source: Chicago Metropolitan Agency for Planning.

- CTA, CDOT, RTA, and Pace had capital expenditures for buses and bus routes:
 - CTA: \$65,638,68
 - CDOT: \$5,876,000
 - RTA: \$11,290,000
 - Pace: \$95,175,334
 -
- CTA and Metra had capital expenditures for rail:
 - CTA : \$357,576,268
 - Metra: \$332,280,175

Transit obligations and awards by agency and project category is shown below. The CTA and Metra obligated most of their funds on maintenance projects. Pace projects were nearly evenly split between modernization and expansion projects, while CDOT and RTA only had modernization project phases.

Figure 11.

FFY 2015 transit obligations and awards by mode, in millions

Source: Chicago Metropolitan Agency for Planning.

Major capital projects and Chicago Region Environmental and Transportation Efficiency Program (CREATE) projects are important components in implementing of GOTO 2040.

Figure 12.

FFY15 major capital and CREATE projects

Source: Chicago Metropolitan Agency for Planning.

The focus of this report is FFY 2015 obligations and awards, but CMAP also has data from FFY 2012 – 2015 that can be compared and analyzed. Obligations and awards prior to FFY 2012 were collected and disseminated in a different manner that does not easily allow for comparisons. Between FFY 2012 and 2015 over \$15 billion was obligated or awarded on transportation infrastructure projects in the CMAP region. The largest amount (42 percent) consisted of non-matching state or local funds. These funds are IDOT funds or local funds such as the Illinois Tollway funds that are part of their multi-year capital program, [Move Illinois](#). Federal Funds, at 35 percent, comprised the next largest category of obligations and awards.

Figure 13.

FFY 2012-2015 obligations and awards

Source: Chicago Metropolitan Agency for Planning.

Starting in FFY 2014, the impact of the Tollway's *Move Illinois* capital plan on road projects (Figure 14) becomes very apparent. Other than a spike in service board funding in FFY 2014 related to the purchase of CTA rail cars, transit obligations and awards have been fairly consistent from FFY 2012 to 2015.

Figure 14.

FFY 2012-2015 road obligations and awards, in millions

Source: Chicago Metropolitan Agency for Planning.

- FFY 2012
- FFY 2013
- FFY 2014
- FFY 2015

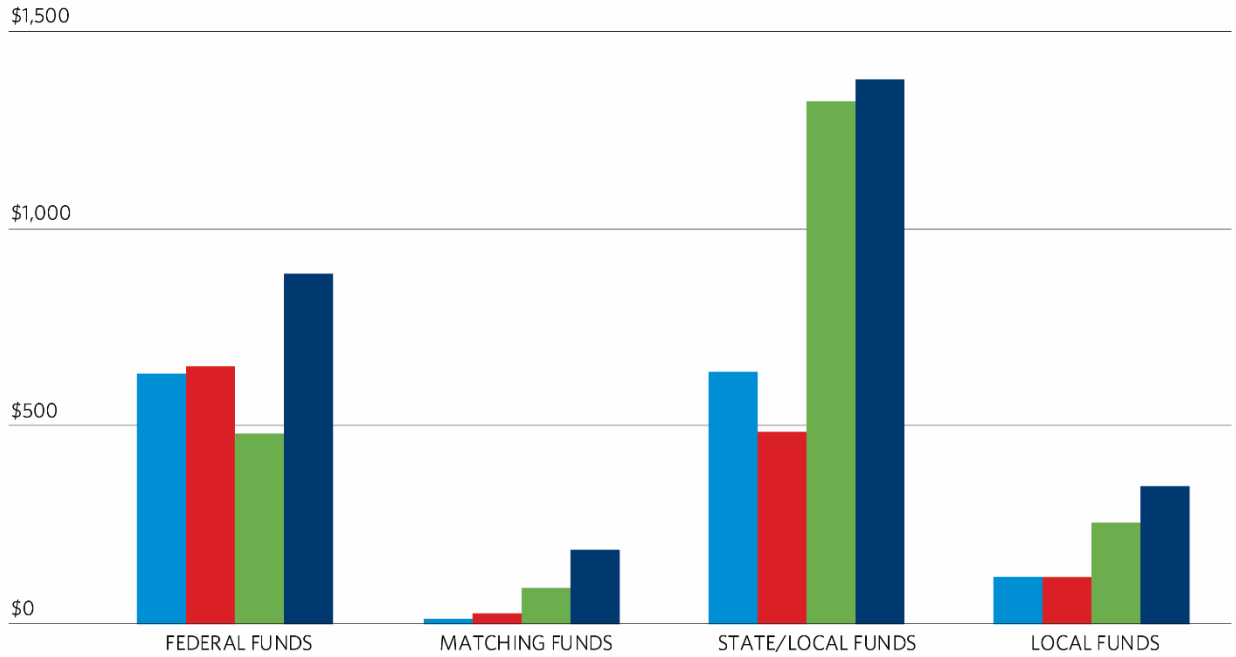

Figure 15.

FFY 2012-2015 transit obligations and awards
in millions

Source: Chicago Metropolitan Agency for Planning.

Obligations and awards using federal funds going back to 2012 for both roads and transit shows a high degree of variation from one year to the next, particularly for projects using FHWA funds. Transit obligations and awards, while not as variable as road obligations and awards, also show significant yearly fluctuations. The differences in road obligations and awards from one year to the next is often in excess of \$300 million.

Figure 16.

FFY 2012-2016 FHWA and FTA Obligations and Awards

Source: Chicago Metropolitan Agency for Planning.

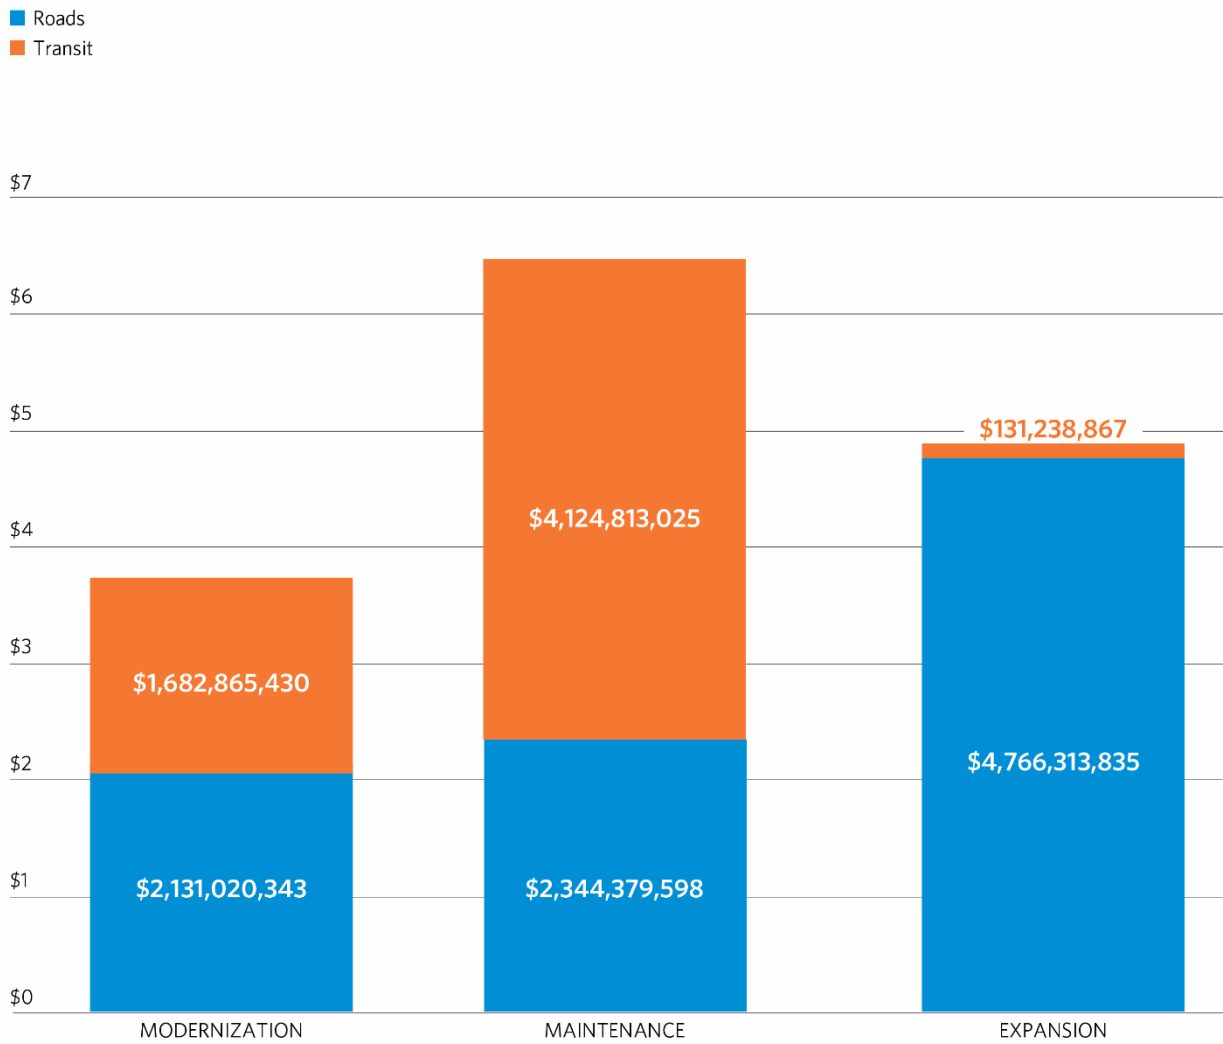

Overall obligations and awards from 2012 through 2015 show that maintenance projects are the largest category followed by expansion and modernization. However, there are significant differences between road and transit projects during this period. Almost all of the expansion projects are road projects (primarily Illinois Tollway projects) while the majority of transit projects are maintenance projects.

Figure 17.

FFY 2012-2015 project category (road and transit),
in billions

FFY 2015 Obligations and Awards

Project Listings

Federally Funded Road Projects

(Interstates, Highways, Streets, Bridges, Bicycle, Pedestrian, etc.)

The following is a list of FFY 2015 expenditures by phase for road projects phases that obligated FHWA funds. Road projects include interstates, highways, arterial streets, local streets, bridges, bicycle and pedestrian projects, intersection improvements, and so on. In sum, a road project is any non-transit project. The descriptions shown are consistent with those in the [TIP](#).

Additionally, while a project may have components associated with a variety of project categories, each project is assigned to only one project category: maintenance, modernization, or expansion. The assignments are based on a hierarchy; any project with an expansion component is assigned to expansion. If a project has no expansion, but has both modernization and maintenance components, it is assigned to modernization. The majority of projects have multiple components, but since only one project category is assigned, the hierarchy results in an understatement of the amount of maintenance being done.

Project phases are sorted by TIP ID (described in [Appendix 3](#)). Because the TIP ID corresponds to Council of Mayors boundaries, projects are grouped geographically. As in the TIP, each phase or fund source is shown as a separate line item. As an example, if a project has a construction phase that is being funded by Surface Transportation Program funds that are locally programmed (STP-Locally Programmed) funds and Congestion Mitigation and Air Quality Improvement (CMAQ) funds, the project phase will be listed twice in the report, once for each fund source. The same is true when there are multiple project phases. For example, if a project includes both construction and right of way (ROW), each phase is listed separately in the report. In this report obligations can be one of two types, New or an Increase. A new obligation is the initial obligation or award that occurred in FFY 2015. Project phases using federal funds are typically in advance construction status. Increases in the obligation or award amount and are either a modified project agreement (MPA) or final voucher (FV). In this report, an MPA reflects an increase in an existing obligation or AC amount for an active project while a FV is for a project phase that had an obligation increase when the project was finalized.

Table 1. FFY 2015 Federally Funded Project Phases

TIP ID	State or Local	Municipality or County	Location	Project Limits	Phase	Work	TIP Fund Code	Federal Funds by Phase	Matching Funds by Phase	State or Local Funds (non-matching) by Phase	Total Funding by Phase	New or Increase	Project Type	Project Classification

Non-Federally Funded Road Projects

(Interstates, Highways, Streets, Bridges, Bicycle, Pedestrian, etc.)

This section lists projects that did not use federal transportation funds for any phase of a road project. The Illinois Department of Transportation (IDOT), the Illinois Tollway Authority or Counties funded most of the project phases listed below. This section does not include obligation estimates for projects that were funded solely by municipalities or townships.

Table 2. FFY15 Non-Federally Funded Project Phases

TIP ID	State or Local	Municipality or County	Location	Project Limits	Phase	Work	TIP Fund Code	Total Funding by Phase	New or Increased Obligation or Award	Project Type	Project Classification

Transit Projects

This section is comprised of transit projects that had expenditures in FFY 2015. The Chicago Transit Authority (CTA), the Chicago Department of Transportation (CDOT), Metra, Pace, and the Regional Transportation Authority (RTA) provided the information contained in this section. As with the previous sections, the projects are sorted by TIP ID, which corresponds to each transit agency (see [Appendix 3](#)), and there is a separate line item for each phase or fund source. The number of transit projects is significantly less than the number of road projects because the transit agencies often group a program of related projects into single entry in the TIP. For example, a single TIP entry for “station improvements” may include the rehabilitation of dozens of stations along various rail lines. All of the transit projects in this section had implementation for a phase due to the grouping, and some projects had more than one phase of implementation or more than one fund source because the various grouped projects may be awarded or obligated over time.

TIP ID	Agency	Work/Location	Rail/Bus or Location	Funding Source	Federal Cost	Matching Funds	Toll Credit Match	State/Local Funds (non-matching) (by Phase)	Service Board Funds (RTA, CTA, Metra, Pace)	Total Project Funding	Mode	Project Classification	Project Type
01-09-0004	CDOT	Union Station Transportation Center (ROW)	Union Station	CMAQ	\$3,400,000	\$850,000	No	\$0	\$0	\$4,250,000	Bus/Pedestrian	Modernization	Transit

Appendices

Appendix 1: Obligation and Award Data Information

This report provides both summaries and detailed data by project phase for all projects that were obligated or awarded in Federal Fiscal Year (FFY) 2015, (October 1, 2014 to September 30, 2015). The obligations and awards that comprise this report occurred during this time frame and are primarily derived from the following sources:

1. IDOT's "For the Record 2015: Fiscal Year 2015 Highway Improvement Awards":
<http://www.idot.illinois.gov/Assets/uploads/files/Transportation-System/Maps-&-Charts/proposed-improvements/ftr2015/2015%20For%20The%20Record.pdf>
2. Low bids on projects as reported by IDOT:
<http://www.idot.illinois.gov/home/resources/Archives/transportation-bulletin-archives>
3. County transportation/highway departments (Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will) summaries and correspondence.
4. Transit agency (RTA, CTA, Metra, and Pace) summary reports and correspondence.
5. Federal Highway Administration (FHWA) Fiscal Management Information System (FMIS).

The Illinois Department of Transportation's (IDOT) fiscal year runs from July 1 to June 30. IDOT annually publishes a list of project phases that are awarded by project phase during the previous State Fiscal Year (SFY), commonly referred to as the "For the Record" (FTR) report. CMAP contacted the seven county transportation departments in the CMAP region, along with the Illinois Tollway to obtain data on project phases awarded by these implementers in FFY 2015. Transit obligation and award information was obtained from summary reports provided by the Service Boards (CTA, Metra, and Pace) and RTA and from information contained in FTA's TrAMS database.

The information for municipalities came from CMAP's [2016 Municipal Survey](#), which requested total award information, rather than a list of individual projects. Township data is from IDOT's For the Record report and is based on MFT distributions to townships found in Part II: State Assistance to Local Government section of the report and does not include project-specific data. This report reflects the use of Transportation Development Credits (TDCs), commonly referred to as "toll credits", on a number of transit projects. TDCs permit states to substitute certain previous toll-financed investments for matching funds on current Federal-aid projects. TDCs are sometimes referred to as a "soft match", in that the match is a credit, instead of actual dollars. The use of TDCs allows federal funds to cover 100 percent of the project cost, instead of combining federal funds with local matching funds. While the use of TDC's does not lessen the

amount of federal funds available to the region, by not providing matching funds to augment federal funds the total amount of funding used in the region is reduced by the amount of TDC's.

Working with IDOT, transit agencies have in recent years significantly increased the use of TDCs as a mechanism to access federal funds. In FFY 2015, 86 transit project phases used TDCs to fulfill the federal match requirements. To accomplish the same projects shown in this report without the use of TDCs, transit agencies would have had to provide \$97,954,047 in additional matching funds. The use of TDCs enabled \$489,950,047 in capital transit expenditures to occur in FFY 2015.

More information on TDCs can be found here:

http://www.fhwa.dot.gov/ipd/finance/tools_programs/federal_aid/matching_strategies/toll_credits.htm.

Appendix 2: Advance Construction Information

Advance construction is a financial tool used by IDOT and FHWA to advance project phases using local funds (typically IDOT funds) while retaining eligibility for future federal funding. Project phases that are expected to use federal funds are almost always authorized and placed in advance construction (AC) status. Advance construction is not a federal obligation at the time that a project phase enters into advance construction. At a later date, IDOT may request to convert a project in advance construction, an advance construction conversion (ACC), to an obligation. While technically this is when an obligation occurs, for the purposes of this report the obligation is included in the FFY when a project enters into advance construction (AC).

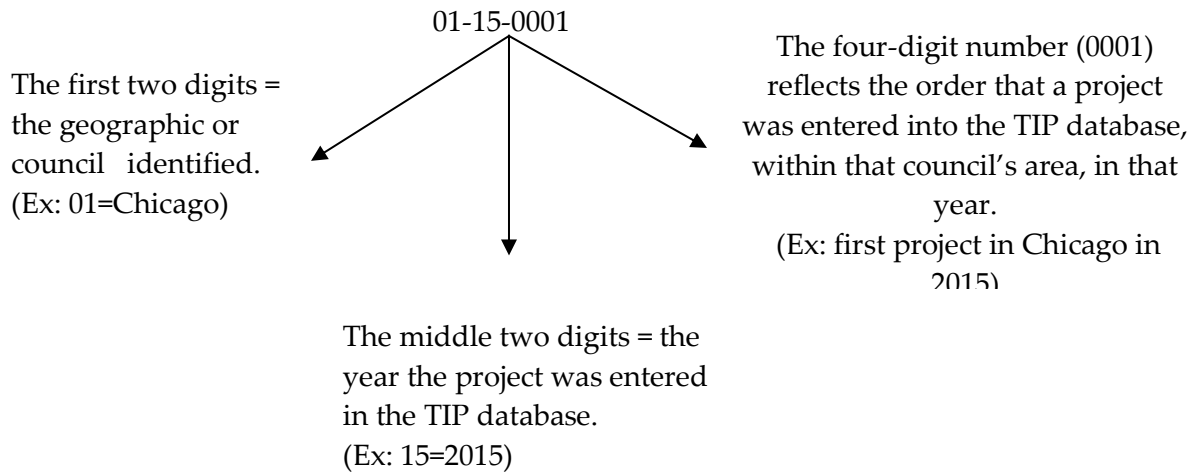

FHWA has more information on advance construction on its website:

https://www.fhwa.dot.gov/ipd/finance/tools_programs/federal_aid/ac_pcac/

Appendix 3: TIP ID

Each TIP ID is comprised of eight digits. The first two digits represent a Council of Mayors area, a transit agency, or a regionwide project. The CMAP region has 11 subregional councils (see [Appendix 4](#)), the City of Chicago, and three transit agencies. The next two digits are the year the project was first entered in the TIP database. The last four digits are unique to that project and are assigned in numerical order within a given year. Below is illustration of the components of a TIP ID.

Geographic codes used in the TIP (first two digits of the TIP ID):

- 01 = City of Chicago
- 02 = North Shore Council of Mayors
- 03 = Northwest Council of Mayors
- 04 = North Central Council of Mayors
- 05 = Central Council of Mayors
- 06 = Southwest Council of Mayors
- 07 = South Council of Mayors
- 08 = DuPage Council of Mayors
- 09 = Kane/Kendall Council of Mayors
- 10 = Lake Council of Mayors
- 11 = McHenry Council of Mayors
- 12 = Will Council of Mayors
- 13 = Regional
- 15 = Unincorporated Cook County
- 16 = Chicago Transit Authority (CTA)
- 17 = Pace
- 18 = Metra

Appendix 4: Council of Mayors Map

Appendix 5: Fund Sources in the TIP

TIP projects receive federal funding through several sources administered by the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA). Multiple non-federal programs also provide funding for TIP projects. All TIP fund sources used in FFY 2015 are listed below, with abbreviations used in the eTIP database and information on the agency that selects projects and programs projects in the TIP.

Congestion Mitigation & Air Quality Improvement Program (CMAQ)

Federal formula funds for projects that will contribute to improving air quality and reducing congestion in areas that do not meet federal air quality standards. Projects are programmed by the CMAP Board and MPO Policy Committee, then implemented by the subregional councils and major implementing agencies. <http://www.cmap.illinois.gov/congestion-mitigation-and-air-quality>

Economic Development (Econ Dev Prgm)

State funds used to provide assistance in improving highway access to new or expanding industrial, distribution, or tourism developments with a focus on the retention and creation of permanent full-time jobs.

Emergency Repair

Provides funding to assist state and local governments with the expense of repairing serious damage to federal-aid highways after natural disasters or catastrophic failures.

Federal Flexible Match

Matching funds through the Federal Flexible Match Program that allows a variety of public and private contributions to be counted towards the non-Federal match (local match).

FTA 5307 Urban Formula

Federal formula funds for capital improvements to transit systems in all urbanized areas of the country. Funds are allocated to the service boards by the RTA and projects are programmed by the service boards.

<https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/FAST%20Act%20Section%205307%20Fact%20Sheet.pdf>

FTA 5309 Core Capacity (5309)

Federal funds for projects that are substantial corridor-based capital investments in existing fixed guideway systems that increase capacity by not less than 10 percent in corridors that are at capacity today or will be in five years.

https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/5309_Capital_Investment_Grant_Fact_Sheet.pdf

FTA Section 5310 – Enhanced Mobility of Seniors and Individuals with Disabilities (5310)

Federal formula funds for the purchase of specially equipped vehicles for the transportation of elderly and mobility-limited persons. Projects are selected and programmed by IDOT's Division of Public and Intermodal Transportation and the RTA.

<https://www.transit.dot.gov/funding/grants/enhanced-mobility-seniors-disabled-fact-sheet-section-5310>

Transit Cooperative Research (FTA 5312 Research)

Provides funding for research that develops near-term, practical solutions such as best practices, transit security guidelines, testing prototypes, and new planning and management tools.

Projects are selected by FTA and programmed by the recipient service boards.

<https://www.transit.dot.gov/funding/grants/public-transportation-innovation-research-fact-sheet-section-5312>

FTA State of Good Repair Grants (5337)

Funding is limited to fixed guideway systems (including rail, bus rapid transit, and passenger ferries) and high intensity bus (high intensity bus refers to buses operating in high occupancy vehicle (HOV) lanes.) Projects are limited to replacement and rehabilitation, or capital projects required to maintain public transportation system in a state of good repair.

https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/5337_State_of_Good_Repair_Fact_Sheet.pdf

FTA Section 5339 – Bus and Bus Facilities (5339)

This capital program provides funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities. Projects are selected and programmed by the service boards. Before MAP-21 this fund source was a discretionary fund for Transit

Alternatives Analysis with projects selected by FTA and programmed by the service boards.

<https://www.transit.dot.gov/sites/fta.dot.gov/files/5339%20Bus%20and%20Bus%20Facilities%20Fact%20Sheet.pdf>

High Growth Cities

State formula funds distributed to municipalities with populations over 5,000 and experiencing above normal growth.

High Priority Projects (HPP)

Federal funds for specific High Priority Projects earmarked by Congress. Projects are selected by Congress and programmed by IDOT.

<https://www.fhwa.dot.gov/federalaid/projects.pdf#hpp>

High Speed Rail

Federal funds for specific projects that will advance the development of High Speed Rail.

Projects are selected by U.S. DOT and programmed by implementing agencies.

Highway Safety Improvement Program

Federal formula funds for highway safety improvement projects on any public road or publicly owned bicycle or pedestrian pathway or trail. Projects are selected and programmed by IDOT.

<http://safety.fhwa.dot.gov/hsip/>

Homeland Security

Federal grant funds that assist in the preparation, prevention, and response to terrorist attacks and other disasters can be used for planning, equipment, training, and exercise needs. Projects are selected by the Department of Homeland Security and programmed by the recipient agency.

IL Funds and IL Funds – Transit

State funds used for highway and/or transit projects

Illinois Commerce Commission Grade Crossing Protection Fund (ICC- RR Safety)

State funds to assist local highway agencies and railroads with the cost of making safety improvements at public highway-rail crossings on local roads and streets. Projects are selected and programmed by IDOT.

<http://www.icc.illinois.gov/railroad/CrossingSafetyImprovement.aspx>

Illinois Jobs Now

State funds from the 2014 state capital construction program, “Illinois Jobs Now!”

Local Funds

Non-MFT funds used to fund transportation projects by Counties, Municipalities, townships, etc.

MFT-Local

Funds from taxes on fuel collected by local jurisdictions for the purpose of improving, maintaining, and repairing and constructing highways.

MFT-State Allocation

State funds from taxes on fuel collected by the state and allocated to local jurisdictions for the purpose of improving, maintaining, repairing, and constructing highways.

National Highway Performance Program (NHPP)

Federal formula funds for projects on National Highway System (NHS) bridges and roadways. These consist of interstate highways and other principal arterials that support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS. Projects are selected and programmed by IDOT.

<https://www.fhwa.dot.gov/fastact/factsheets/nhppfs.cfm>

National Highway System Program (NHS)

Federal formula funds for projects on the National Highway System. Projects are selected and programmed by IDOT. <http://www.fhwa.dot.gov/safetealu/factsheets/nhs.htm>

Projects of National and Regional Significance

Federal funds designated for the CREATE program and O'Hare western access. Projects are selected by U.S. DOT and programmed by IDOT.

<http://www.fhwa.dot.gov/safetealu/factsheets/natlregl.htm>

Rail-Highway Crossing

Federal formula funds for safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings. Projects are selected and programmed by IDOT.

<http://safety.fhwa.dot.gov/xings/>

Recreational Trails Program (Rec Trails)

Federal formula funds for the development and maintenance of recreational trails and trail-related facilities for both nonmotorized and motorized recreational trail uses. Projects are selected and programmed by IDNR.

https://www.fhwa.dot.gov/environment/recreational_trails/guidance/

RTA Bonds

Revenue bonds issued by the RTA with debt service paid using RTA revenues.

RTA Sales Tax

Funds collected through sales tax in the six-county RTA service area.

RTA Tax – Collar Counties

County transportation enhancement funds collected through the RTA Sales Tax and distributed via formula to DuPage, Kane, Lake, McHenry and Will counties.

Safe Routes to School

Federal formula funds for projects that enable and encourage primary and secondary school children to walk and bicycle to school. Projects are selected by IDOT and programmed by subregional councils, CMAP, and/or IDOT. New allotments of these funds were discontinued in MAP-21.

<https://www.fhwa.dot.gov/safetealu/factsheets/saferoutes.htm>

Service Board Funds

State formula funds from the Illinois state sales tax collected in the six-county RTA service area distributed to CTA, Pace, and Metra. Programmed by the service boards.

Special Assessments, Tax Increment Financing and Private Sources (Private)

Funds from private entities and/or special assessments over and above the standard property tax rate and/or special taxing districts designed to finance local governments' infrastructure improvements. Projects are selected and programmed by the implementing agency or subregional council.

State Match – Chicago

State funds used to match federal funds for projects in the City of Chicago.

State Matching Assistance

State funds used to assist counties in matching federal funds.

Surface Transportation Block Grant (STP-Locally Prgmd, STP-State Prgmd Urban, STP-State Prgmd Rural, STP-County)

Federal formula funds for federal-aid eligible highways, public bridges, or transit capital projects. Projects selected and programmed by subregional councils (STP-Locally Programmed), local governments (STP-County), and IDOT (STP-State Programmed Rural, STP-State Programmed Urban). <http://www.cmap.illinois.gov/about/involvement/committees/advisory-committees/council-of-mayors/surface-transportation-program>

Surface Transportation Program (STP) – Bridge (STP-Bridge)

Federal formula funds (funds are an STBG set aside) for the rehabilitation, replacement, preservation, and protection of bridges and tunnels. Projects are selected by IDOT and programmed by subregional councils, counties and IDOT.

Surface Transportation Program (STP) – Enhancements (STP-Enhancements)

Federal formula funds for projects such as bicycle and pedestrian facilities, historic preservation and others that enhance the transportation system. Projects are selected by IDOT and programmed by subregional councils, CMAP and IDOT.

Tollway Funds

Funds collected by the Illinois State Toll Highway Authority (Tollway) for exclusive use on the tollway system. Projects are included in the TIP for information only. Projects are selected and programmed by Tollway.

Township Bridge Program (Township Bridge Prgm)

State formula funds distributed to townships and road districts for the construction of bridges.

Transportation Alternatives Program (TAP - State Prgmd, TAP – Locally Prgmd)

Federal formula funds for the development and maintenance of recreational trails and related facilities; projects that provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs; and projects such as landscaping, streetscaping, historic preservation, and others that enhance the transportation system. Project selection is by IDOT (TAP-S) and CMAP (TAP-L). Projects will be programmed by subregional councils, IDOT, and/or CMAP.

<https://www.fhwa.dot.gov/fastact/factsheets/transportationalternativesfs.cfm>

Transportation Development Credits (Trans Credit – Transit)

Toll revenue capital expenditures used as credit toward the non-federal matching share of eligible highway programs and transit projects.

Transportation Infrastructure Finance and Innovation Act (TIFIA)

Not a federal fund source per se, TIFIA is a federal credit assistance to public agencies for transportation projects of national and regional significance. Projects are selected by and programmed by FHWA. <http://www.fhwa.dot.gov/ipd/tifia/>

Transportation Investment Generating Economic Recovery (TIGER)

Discretionary federal funds to support projects that will have a significant impact on the Nation, a metropolitan area, or a region. Projects are chosen by the Federal Highway Administration and programmed by Council of Mayors, CDOT, Counties, IDOT, or Illinois Tollway.

Truck Access Route Program (Truck Access Rt Prgm)

State discretionary funds for safety improvements at rail-highway crossings.

Appendix 6: Project Phases

Phase	Description
Engineering (ENG)	Engineering and or environmental work for transit or other projects that have either combined Phase 1 and Phase 2 engineering, or no distinct Phase 1 and Phase 2 engineering.
Phase 1 Engineering (EI)	Often called preliminary engineering; this is typically the first phase of a project and includes determination of the project purpose and need, assessment of alternatives, determination of environmental impacts, public involvement, and preliminary design and cost estimates for the preferred alternative.
Phase II Engineering (EII)	Preparation of construction plans, specifications, and cost estimates used in preparing final contract documents to be bid on by contractors. Sometimes called the design phase.
Right of Way Acquisition (ROW)	The purchase of right of way and temporary or permanent easements needed for a project.
Construction Engineering (CE)	Engineering and inspection work that occurs as part of the construction phase.
Construction (C)	The construction of a project.
Implementation (IMP)	Implementation of a project. This phase is common with non-infrastructure projects that do not include physically constructed items. Examples are buying equipment or marketing.

Appendix 7: Programmers and Implementers

Local Government

- City of Chicago
- Central Council of Mayors
- DuPage Mayors and Managers Conference
- Kane/Kendall County Council of Mayors
- Lake County Council of Mayors
- McHenry County Council of Mayors
- North Central Council of Mayors
- North Shore Council of Mayors
- Northwest Council of Mayors
- Park Districts
- South Suburban Mayors and Managers Association
- Southwest Conference of Mayors
- Townships
- Will County Governmental League

Counties

- Cook County
- DeKalb County (partial)
- DuPage County
- Forest Preserve and Conservation Districts

Chicago, Illinois 60606
312-454-0400
ONTO2050@cmap.illinois.gov
www.cmap.illinois.gov

The Chicago Metropolitan Agency for Planning (CMAP) is our region's comprehensive planning organization. The agency and its partners are developing ON TO 2050, a new comprehensive regional plan to help the seven counties and 284 communities of northeastern Illinois implement strategies that address transportation, housing, economic development, open space, the environment, and other quality-of-life issues. See www.cmap.illinois.gov for more information.
