 - Appendix 7: Programmers and implementers 121

Introduction

This report identifies obligations or awards of project phases that occurred in Federal Fiscal Year (FFY) 2016 (October 1, 2015, to September 30, 2016) in the Chicago Metropolitan Agency for Planning (CMAP) region, building on federally mandated reporting requirements set out in [23 CFR 450.334](#).

An obligation occurs after the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) signs an authorization, which is a commitment to participate financially in a project. The obligation means that funds are assigned to the project and are available for reimbursement to the implementing agency.

The obligation process used by Illinois Department of Transportation (IDOT) makes extensive use of advance construction (AC) (see [Appendix 2](#) for more information) as a financial tool for projects using FHWA funds. This report treats project phases that have federal obligations or have been authorized in AC the same, as obligations.

Obligations are also used for transit projects. An FTA obligation is a grant agreement between a project sponsor and the FTA, often for a specific funding type and for all project phases.

An award occurs when a construction bid is opened, a construction contractor or engineering consultant has been selected, and a contract has been executed. For state or locally funded projects, “award” is synonymous with “obligation” in this report.

The CMAP region annually spends billions of dollars on transportation infrastructure. While a large portion of this is federal or state funds, counties, municipalities, and townships also spend their own locally derived funds. CMAP makes an effort to collect information about locally derived funds expenditures, going beyond the requirement to report only FHWA, FTA, and major capital project obligations and awards in the obligation report. Information in this report is from Federal, State and local obligations and awards used for transportation infrastructure projects (see [Appendix 1](#) for more detail.)

Information on locally funded project phases is derived from a variety of sources. Municipal information is from a municipal survey CMAP conducted in 2016. Municipalities were asked how much local funding they spent on projects that utilized only local funds. Township data is based on Motor Fuel Tax (MFT) distribution from IDOT to townships as reported in IDOT’s 2016 For the Record report. CMAP receives county information directly from the counties and through publically accessible budgets or county board actions.

CMAP also works with local transit agencies, including the Chicago Transit Authority (CTA), Metra, Pace, and the Regional Transportation Authority (RTA), to capture annual expenditures for capital transit projects that do not utilize federal or state funding.

This report includes both summaries and project phase listings for projects that counties and transit agencies accomplished using only local funds. Those phases are included in the list of non-federally funded road projects and the list of transit projects. However, the same level of detail is not included for municipal and township projects using only local funds because that information is not available.

The project phases represented in this report are all located within the CMAP region, comprising Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will counties and portions of DeKalb and Grundy counties. The region is also divided geographically by [Council of Mayors](#) boundaries. Each municipality in the region belongs to, and is categorized within, a council. In this report, these boundaries are used to summarize and compare data across the region.

CMAP also classifies projects into one of three categories: maintenance, modernization, or expansion. Each project's classification is based on its [project and work types](#) reported by the implementing agency to describe the project in the Transportation Improvement Program (TIP).

CMAP collects both project type and work type data, and uses this information to demonstrate progress toward implementing our regional priorities. Priorities in the region's [GO TO 2040 long-range comprehensive plan](#) include maintaining and modernizing the existing transportation system before expanding it, an increased commitment to public transportation, and investments to support livable communities.

The data in this report are available [electronically as part of the TIP documentation](#). CMAP has developed [numerous online tools](#) summarizing transportation programming data throughout the region.

This report is organized into the following sections:

- [Graphics](#) summarizing obligations and awards in a variety of categories.
- A list of [federally funded road projects](#), including bicycle/pedestrian projects.
- A list of [non-federally funded road projects](#). Regionally significant projects are included in this section.
- A list of [transit projects](#). This list includes non-federal and federally funded transit projects obligated/awarded in FFY 2016 in the CMAP region.
- A series of [appendices](#) that explain data sources and data summarizing techniques, as well as other information.

Summaries of obligations and awards

These summaries highlight the region’s capital transportation obligations and awards and demonstrate their relationship to GO TO 2040 priorities. Completion of planning, design and construction of a transportation project may require many years. As a result, the obligations/awards shown in this report reflect projects that were underway prior to the adoption of GO TO 2040 in October 2010. The summaries reflect all obligations or awards incurred in FFY 2016, regardless of fund source.

Figure 1.

Obligations and awards by major funding category in FFY 2016

Note: Included in local funds are CMAP estimates of municipal and township obligations.

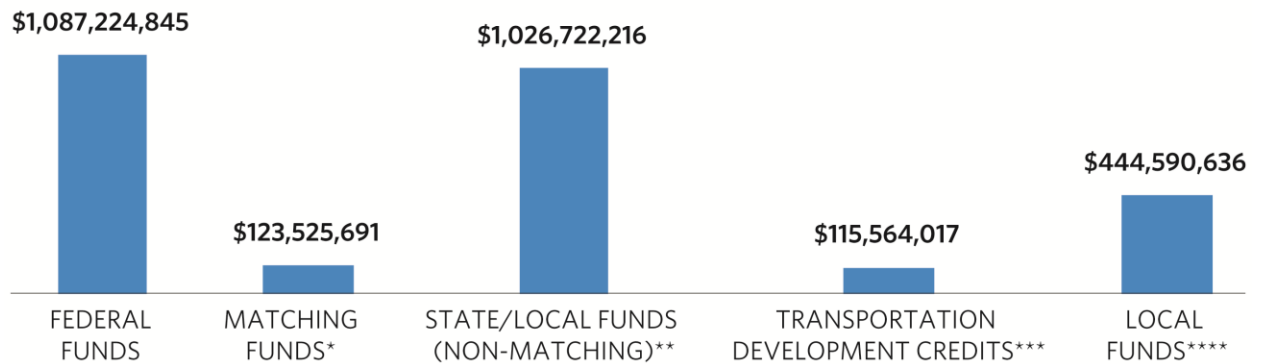

*Matching funds are state or local funds used in conjunction with federal funds.

**Non-matching funds are in addition to the required match for federal funds or for a project phase not utilizing federal funds, such as Tollway funded projects.

***Transportation development credits have no monetary value and are used as a mechanism to access federal funds.

****Local funds are non-matching funds derived through local sources that are used by a local agency, such as a county or municipality.

Source: Chicago Metropolitan Agency for Planning.

- Capital transportation obligations and awards in FFY 2016 totaled \$2,797,627,405.
- Federal funds typically cover a portion (often 80 percent) of project cost and require a funding match comprising non-U.S. Department of Transportation (DOT) funds, usually state or local funding, or transportation development credits.
- Fifty-six percent of state/local funds (non-matching) were for Illinois Tollway project phases.
- Non-federal funding is primarily from the State of Illinois and does not have a matching requirement.

Figure 2.

**Obligations and awards by project phase
in FFY 2016**

Source: Chicago Metropolitan Agency for Planning.

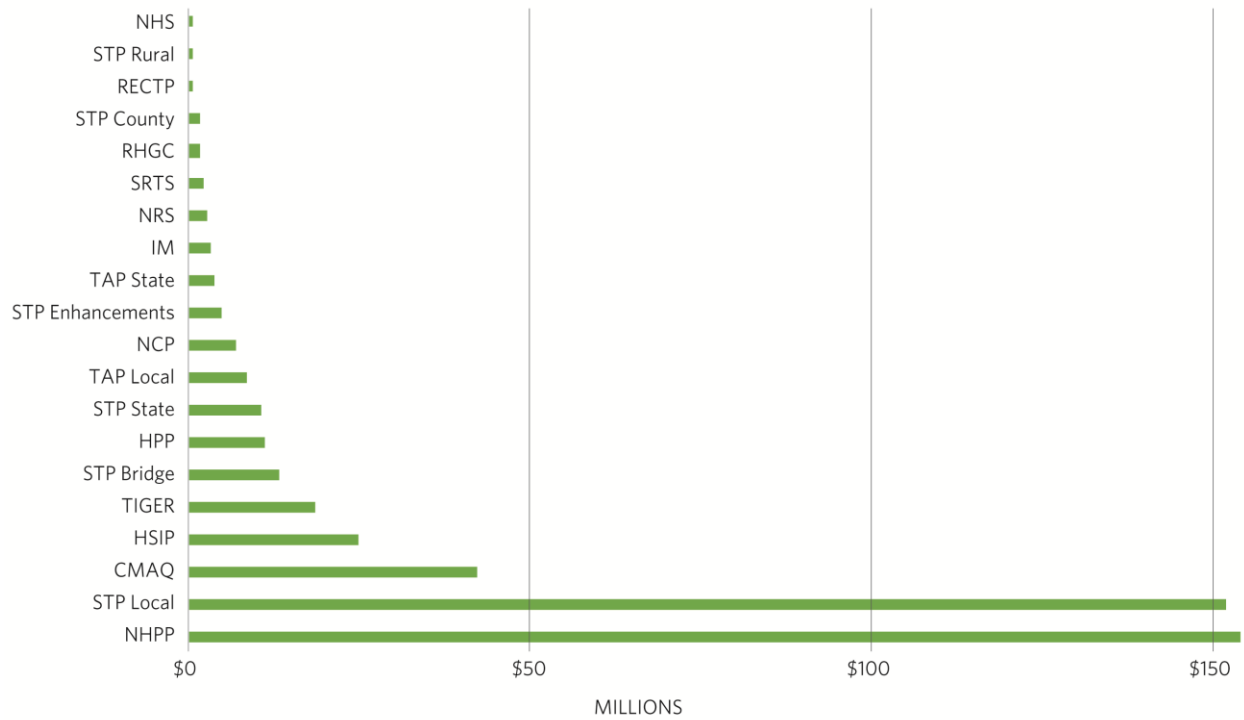

- Construction and implementation account for 89 percent of the region's obligations and awards in FFY 2016.
- Pre-construction/construction engineering phases accounts for 10% of the region's obligations and awards and is a standard ratio of engineering to construction costs.
- Right of Way acquisition (ROW) accounted for 1 percent of all obligations and awards in FFY 2016.

Figure 3.

FFY 2016 obligations by Federal Highway Administration fund source

Source: Chicago Metropolitan Agency for Planning.

- FFY 2016 FHWA obligations in the region totaled \$463,704,367.
- Three fund categories (Congestion Mitigation and Air Quality Improvement (CMAQ), National Highway Performance Program (NHPP), and Surface Transportation Program-Locally Programmed (STP Local)) accounted for more than 75 percent of all of the FHWA expenditures.

Figure 4.

FFY 2016 obligations by Federal Transit Administration fund source

Source: Chicago Metropolitan Agency for Planning.

- In FFY 2016, \$580,081,815 in FTA funds were obligated.
- Two fund categories (5307, 5337) accounted for more than 93 percent of funding from the FTA in FFY 2016.
- 5307 funds are used for capital improvements to the transit system.
- 5337 funds are formula funds used in achieving a state of good repair on the transit system.
- 5339 funds are formula funds used to improve buses and bus facilities.
- Nearly all of these funds are allocated to the region based on federal funding formulas that primarily rely on the urbanized-area population of the region.
- [Appendix 5](#) has detailed information regarding the various funding sources that are in the TIP, many of which had obligations or awards in FFY 2016.

Figure 5.

Locally funded obligations and awards used for local projects only in FFY 2016

Source: Chicago Metropolitan Agency for Planning.

- In 2016, \$364,600,538 in local funds were spent on local road project phases.
- Transit project phases that used only local funds totaled \$180,570,290.
- Project phases that were funded only with local funds amounted to over \$545 million or 19 percent of the total amount obligated or awarded in FFY 2016. This is over and above the amount of local funds used to match federal funds or in combination with state funds.

GO TO 2040 recommends "... a focus on maintaining the existing system first, and using most of our remaining resources to modernize the system." To reflect these priorities and allow CMAP to track the region's progress, projects are broadly placed into one of three general project categories: maintenance, modernization, or expansion. While a project may have components associated with any or all three project categories, each project is only assigned to one project category as CMAP does not have enough information to accurately allocate a particular project's financial information among categories. The assignments are based on a hierarchy with expansion at the highest level, followed by modernization, then maintenance. Projects that fit into multiple categories are assigned to the highest category level. Thus, when a project that has an expansion component, all of the phases for that project are classified as expansion.

Road and transit project phases show significant differences in the project categories for FFY 2015 obligations and awards. Nearly all transit funding was dedicated to maintenance and modernization of the existing system.

Figure 6.

FFY 2016 road obligations and awards by project classification

Source: Chicago Metropolitan Agency for Planning.

- The reconstruction of the I-90 Jane Addams Memorial Tollway awarded \$329,512,916 in FFY 2016. This is 12 percent of all FFY 2016 road modernization obligations and awards.
- Over \$58 million was awarded for The Jane Byrne/Circle Interchange in FFY 2016. This project is primarily a modernization project; however, all of the funding is classified as expansion as there are some elements that are expansion. This indicates how the project classification hierarchy can affect the summary data.
- The rehabilitation of I-55 from Pulaski Road to Weber Road was the largest maintenance project obligated in FFY 2016 at \$50 million.

Figure 7.

FFY 2016 transit obligations and awards by project classification

Source: Chicago Metropolitan Agency for Planning.

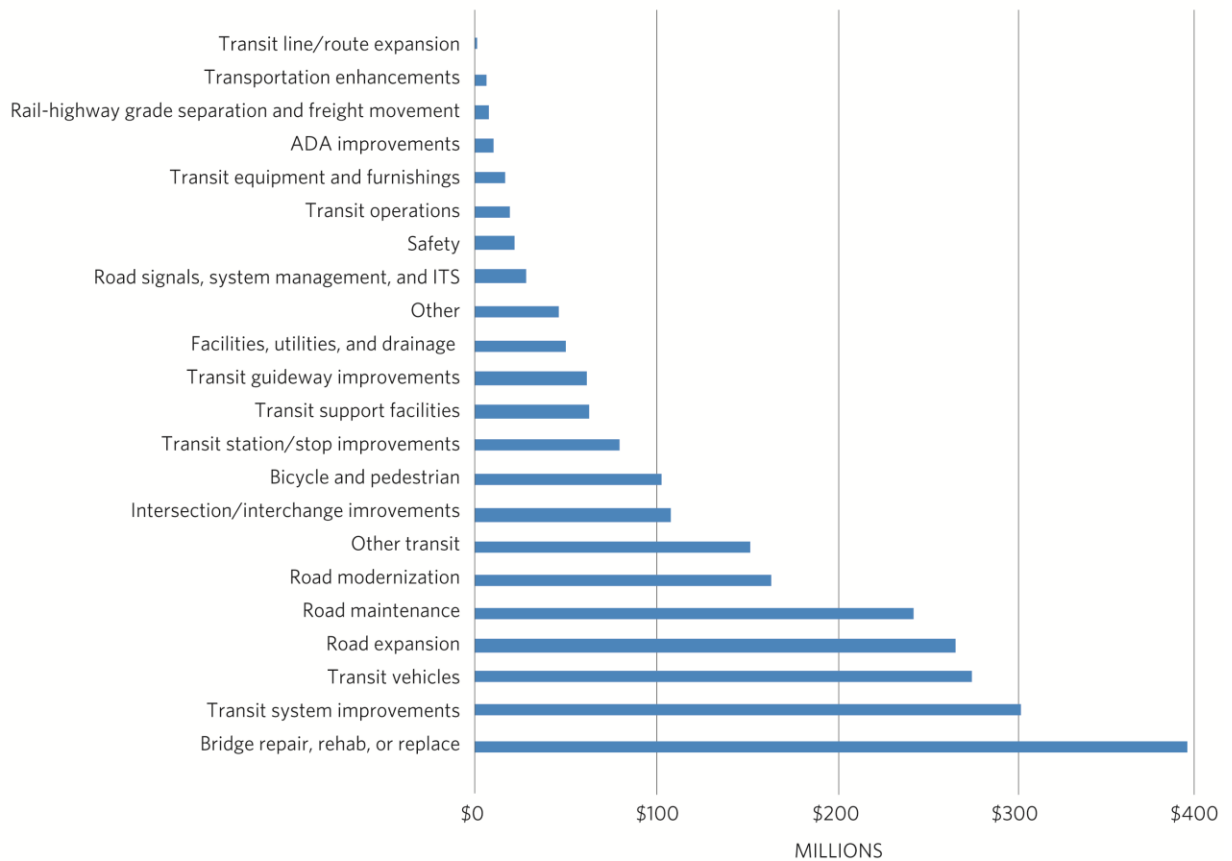

- Positive Train Control accounted for over \$250 million in Metra’s FFY 2016 expenditures, approximately 75% of the region’s transit system modernization efforts.
- CTA and Pace each obligated about \$38 million for purchasing buses.

In addition to the project categories that illustrate the region’s efforts to maintain, modernize and expand the transportation network, projects and their associated phases are also classified by project type to reflect investment in non-motorized transportation such as sidewalk improvements and bike paths, transit enhancements such as new equipment and improved operations, and various types of highway and road improvements including safety and intelligent transportation systems.

Figure 8.

FFY 2016 obligations by project type

Source: Chicago Metropolitan Agency for Planning.

The following chart shows how the transit agencies and CDOT obligated funds by mode in FFY 2016. The “Other” category includes bond payments, computer upgrades, and other systemwide investments.

Figure 9.

FFY 2016 transit obligations and awards by mode

Source: Chicago Metropolitan Agency for Planning.

CTA and Pace expended more than \$125 million for buses and bus routes:

- CTA: \$73,687,170
- Pace: \$51,431,444

CDOT, CTA, and Metra expended nearly \$630 million for capital improvements on rail lines and equipment:

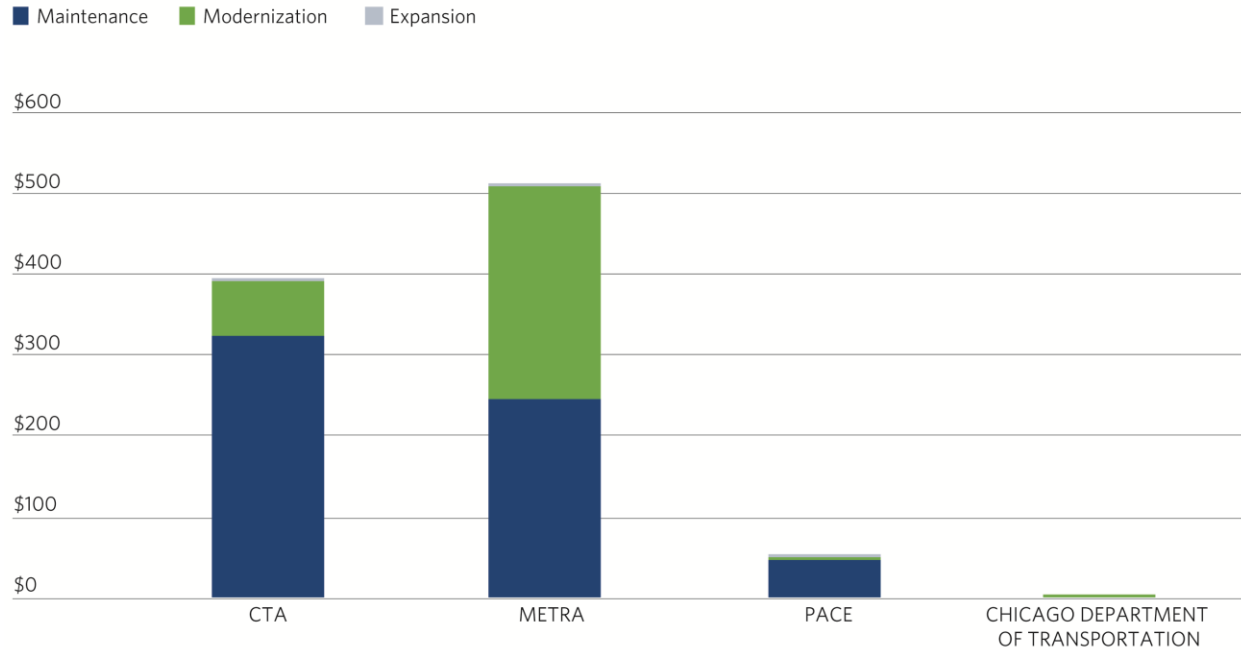

- CDOT: \$2,000,000
- CTA: \$118,376,463
- Metra: \$508,348,345

Transit obligations and awards by agency and project category are shown below. The CTA and Pace obligated most funds on maintenance projects, and Metra allocated an equal amount of funding to maintaining and modernizing the system. CDOT modernized one major elevated rail station.

Figure 10.

FFY 2016 transit obligations and awards by implementing agency, in millions

Source: Chicago Metropolitan Agency for Planning.

Major capital projects and Chicago Region Environmental and Transportation Efficiency Program (CREATE) projects are important components of GO TO 2040. The major capital projects are expected to have a significant effect on the capacity of the region’s transportation system performance and include extensions or additional lanes on the interstate system, new expressways, major new expressway-to-expressway interchanges, and similar changes to the public transit system. The CREATE projects support the region’s freight network and improve the performance of the region’s passenger rail network.

Figure 11.

FFY 2016 obligations for CREATE and GO TO 2040 major capital projects

Source: Chicago Metropolitan Agency for Planning.

The focus of this report is FFY 2016 obligations and awards, but CMAP also analyzed time series data from FFY 2012-16. Obligations and awards prior to FFY 2012 were collected and classified in a different manner and cannot easily be compared to FFY 2016. Between FFY 2012-16 more than \$18.5 billion was obligated or awarded for transportation infrastructure projects in the CMAP region. The largest share (41 percent) consisted of non-matching state or local funds. These funds were IDOT funds or local funds such as Illinois Tollway resources committed to their multi-year capital program, [Move Illinois](#). Federal Funds (36 percent) were the next largest category of obligations and awards.

Figure 12.

FFY 2012-16 obligations and awards

Source: Chicago Metropolitan Agency for Planning.

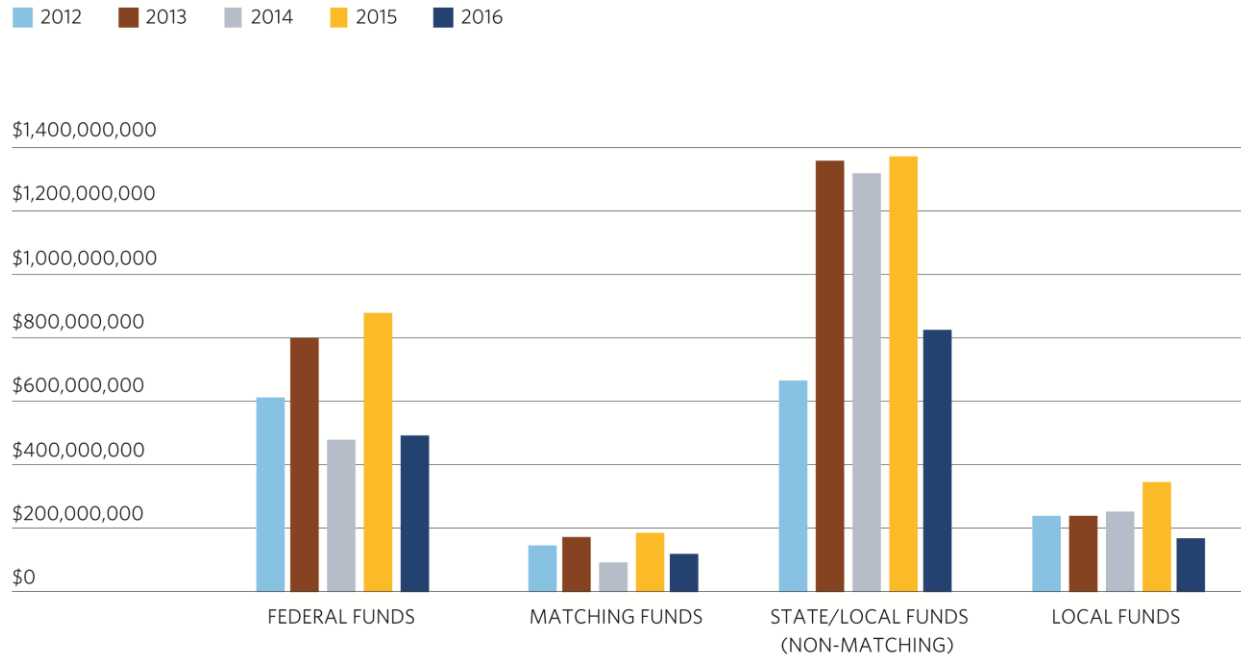

From FFY 2012-16, road obligations have varied under all funding sources. FFY 2016 data reflects an overall decrease in funding from past years attributed to lower federal obligations as well as significantly less state and local spending.

Figure 13.

FFY 2012-16 road obligations and awards

Source: Chicago Metropolitan Agency for Planning.

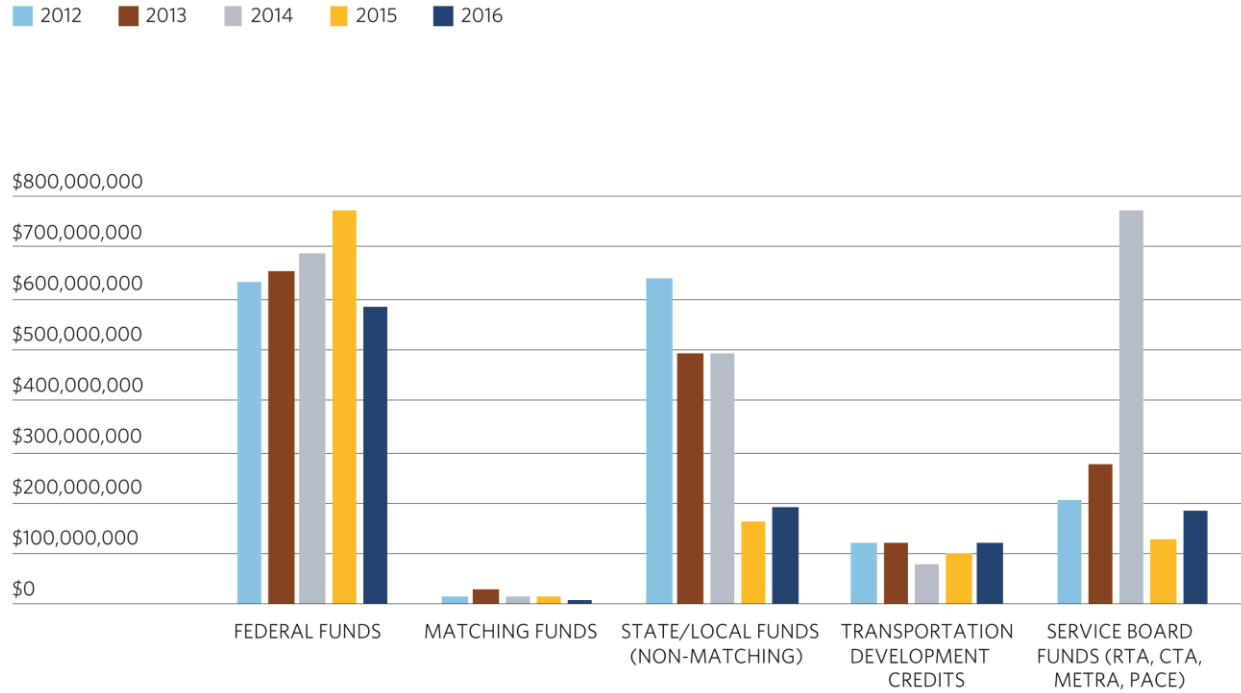

Transit obligations and awards have also varied from FFY 2012 to 2016, with a slight drop off in federal funding in 2016, decreased state funding in 2015 and 2016 and a recently increasing trend in the use of transportation development credits. The spike in service board funding in FFY 2014 was caused by the purchase of CTA rail cars.

Figure 14.

FFY 2012-16 transit obligations and awards

Source: Chicago Metropolitan Agency for Planning.

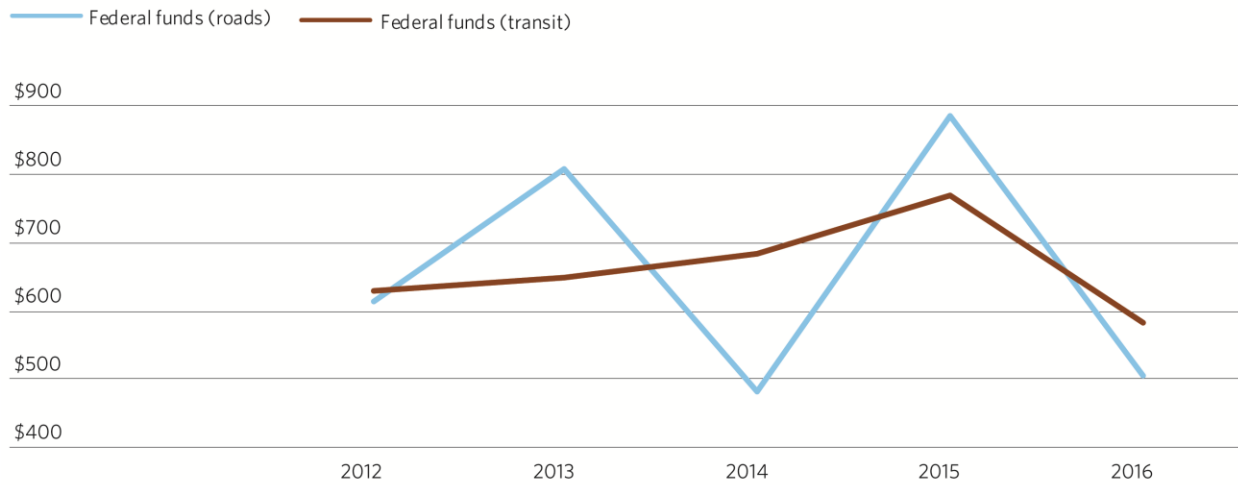

Obligations and awards using federal funds going back to 2012 for both roads and transit shows a high degree of variation from one year to the next, particularly for projects using FHWA funds. Transit obligations and awards, while not as variable as road obligations and awards, also show significant yearly fluctuations.

Figure 15.

FFY 2012-16 Federal Highway Administration and Federal Transit Administration obligations and awards, in millions

Source: Chicago Metropolitan Agency for Planning.

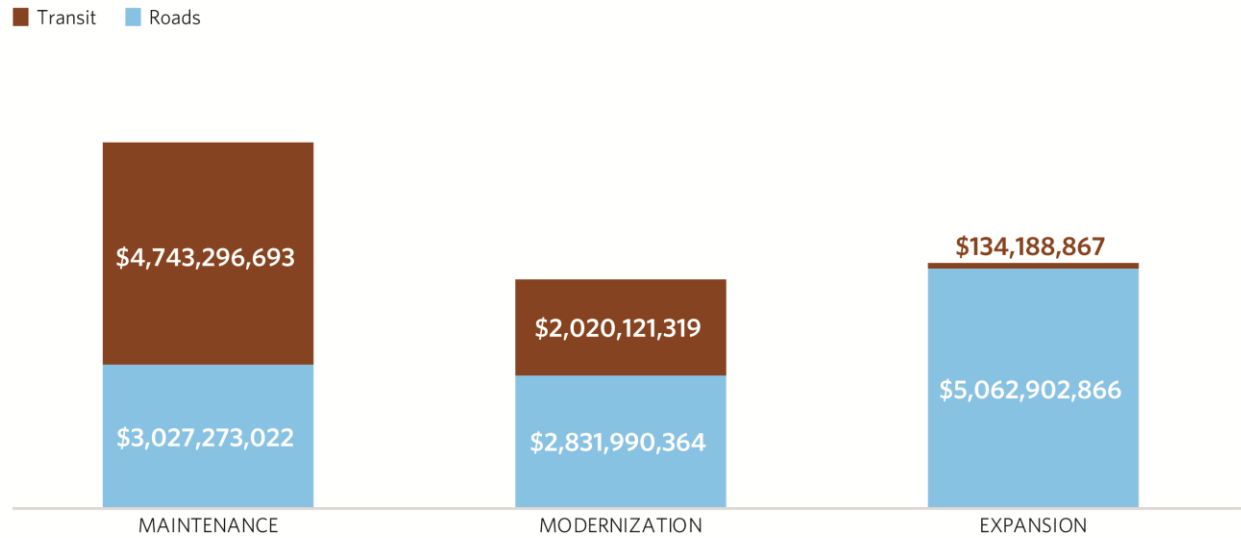

Overall obligations and awards from 2012-16 show that maintenance projects are the largest category followed by expansion and modernization. However, there are significant differences between road and transit projects during this period. Almost all of the expansion projects are road projects (primarily Illinois Tollway projects) while the majority of transit projects are maintenance projects.

Figure 16.

FFY 2016 obligations and awards

Project listing

Federally funded road projects

The following is a list of FFY 2016 expenditures by phase for road projects phases that obligated FHWA funds. A road project is defined as any non-transit project. Road projects include interstates, highways, arterial streets, local streets, bridges, bicycle and pedestrian projects, and intersection improvements. The descriptions shown are consistent with those in the [TIP](#). Additionally, while a project may have components associated with a variety of project categories, each project is assigned to only one project category: maintenance, modernization, or expansion. The assignments are based on a hierarchy; any project with an expansion component is assigned to expansion. If a project has no expansion, but has both modernization and maintenance components, it is assigned to modernization. The majority of projects have multiple components, but since only one project category is assigned, the hierarchy results in an understatement of the amount of maintenance being done and an overstatement in the amount of expansion.

Project phases are sorted by TIP ID (described in [Appendix 3](#)). Because the TIP ID corresponds to Council of Mayors boundaries, projects are grouped geographically. As in the TIP, each phase or fund source is shown as a separate line item. As an example, if a project has a construction phase that is being funded by STP-Locally Programmed funds and CMAQ funds, the project phase will be listed twice in the report, once for each fund source. The same is true when there are multiple project phases. For example, if a project includes both construction and right of way (ROW), each phase is listed separately in the report. In this report obligations can be one of two types: new or an increase. A new obligation is the initial obligation or AC authorization that occurred in FFY 2016. Project phases using federal funds are typically in AC status. Increases in the obligation or award amount are either a modified project agreement (MPA) or final voucher (FV). In this report, an MPA reflects an increase in an existing obligation or AC amount for an active project while a FV is for a project phase that had an obligation increase when the project was finalized.

Non-federally funded road projects

This section lists projects that did not use federal transportation funds for any phase of a road project. The vast majority of these projects are funded by IDOT using state resources, but in some cases local funds are also used. This section does not include obligation estimates for projects that were funded solely by municipalities or townships.

Table 2. FFY 2016 Non-federally funded project phases

Transit projects

This section is comprised of transit projects that had expenditures in FFY 2015. The FTA, CTA, Chicago Department of Transportation (CDOT), Metra, Pace, and RTA provided the information contained in this section. As with the previous sections, the projects are sorted by TIP ID, which corresponds to each transit agency (see [Appendix 3](#)), and there is a separate line item for each phase or fund source. The number of transit projects is significantly less than the number of road projects because the transit agencies often group a program of related projects into single entry in the TIP. For example, a single TIP entry for “station improvements” may include the rehabilitation of dozens of stations along various rail lines. All of the transit projects in this section had a phase of implementation due to the grouping, and some projects had more than one phase of implementation or more than one fund source because the various grouped projects may be awarded or obligated over time.

Table 3. FFY 2016 Transit projects

Appendices

Appendix 1: Obligation and award data information

This report provides both summaries and detailed data by project phase for all projects that were obligated or awarded in FFY 2016 (October 1, 2015, to September 30, 2016). The information on obligations and awards included in this report occurred during this time frame and are primarily derived from the following sources:

1. [IDOT's "For the Record: Fiscal Year 2016"](#)
2. Low bids on projects as reported by IDOT in their [Transportation Bulletin Archives](#).
3. County transportation/highway departments' (Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will) summaries and correspondence.
4. Transit agency (RTA, CTA, Metra, and Pace) summary reports and correspondence.
5. FTA Transit Award Management System (TrAMS).
6. FHWA Fiscal Management Information System (FMIS).

IDOT's fiscal year runs from July 1 to June 30. IDOT annually publishes a list of awarded project phases during the previous State Fiscal Year (SFY), commonly referred to as the "For the Record" (FTR) report.

CMAP contacted the seven county transportation departments in the CMAP region and the Illinois Tollway to obtain data on project phases awarded by these implementers in FFY 2016. Transit obligation and award information was obtained from summary reports that the RTA and service boards (CTA, Metra, and Pace) provided and from FTA's TrAMS database.

The information for municipalities came from CMAP's [2016 Municipal Survey](#), which requested total award information, rather than a list of individual projects. Township data is from IDOT's For the Record report, is based on MFT distributions to townships found in the Part II: State Assistance to Local Government section of the report, and does not include project-specific data.

This report reflects the use of Transportation Development Credits (TDCs), commonly referred to as "toll credits," on a number of transit projects. TDCs permit states to substitute certain previous toll-financed investments for matching funds on current federal-aid projects. TDCs are sometimes referred to as a "soft match," in that the match is a credit, instead of actual dollars. The use of TDCs allows federal funds to cover 100 percent of the project cost, instead of combining federal funds with local matching funds. The use of TDC's does not reduce the amount of federal funds available to the region. However, by not providing actual matching funds to augment federal funds, the total amount of funding used in the region is reduced by the amount of TDC's.

Working with IDOT, transit agencies have in recent years significantly increased the use of TDCs as a mechanism to access federal funds. In FFY 2016, 98 transit project phases used TDCs to fulfill the federal match requirements. To accomplish the same projects shown in this report without the use of TDCs, transit agencies would have had to provide \$115,564,017 in additional matching funds. The use of TDCs enabled \$567,490,085 in capital transit expenditures to occur in FFY 2016.

More information on TDCs can be found here:

http://www.fhwa.dot.gov/ipd/finance/tools_programs/federal_aid/matching_strategies/toll_credits.htm.

Appendix 2: Advance construction information

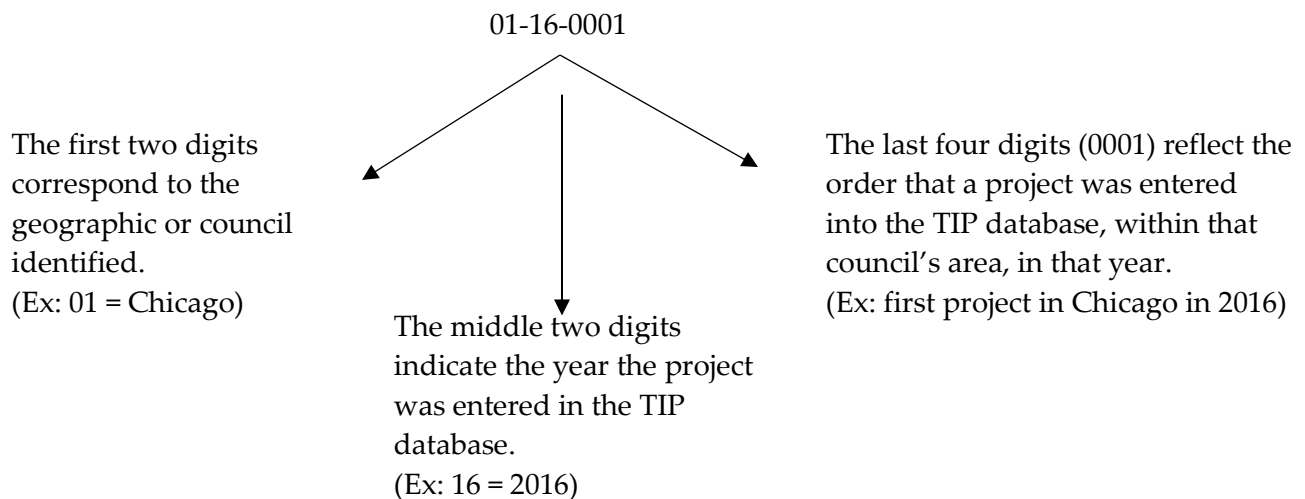

Advance construction is a financial tool used by IDOT and FHWA to advance project phases using local funds (typically IDOT funds) while retaining eligibility for future federal funding. Project phases that expect to use federal funds are usually authorized and placed in advance construction (AC) status. Advance construction is not a federal obligation at the time that a project phase enters into AC. IDOT will request an advance construction conversion (ACC) when needed. While technically this is when an obligation occurs, for the purposes of this report the obligation is included in the FFY when a project enters into AC.

FHWA has more information on AC on its website:

https://www.fhwa.dot.gov/ipd/finance/tools_programs/federal_aid/ac_pcac/.

Appendix 3: TIP ID

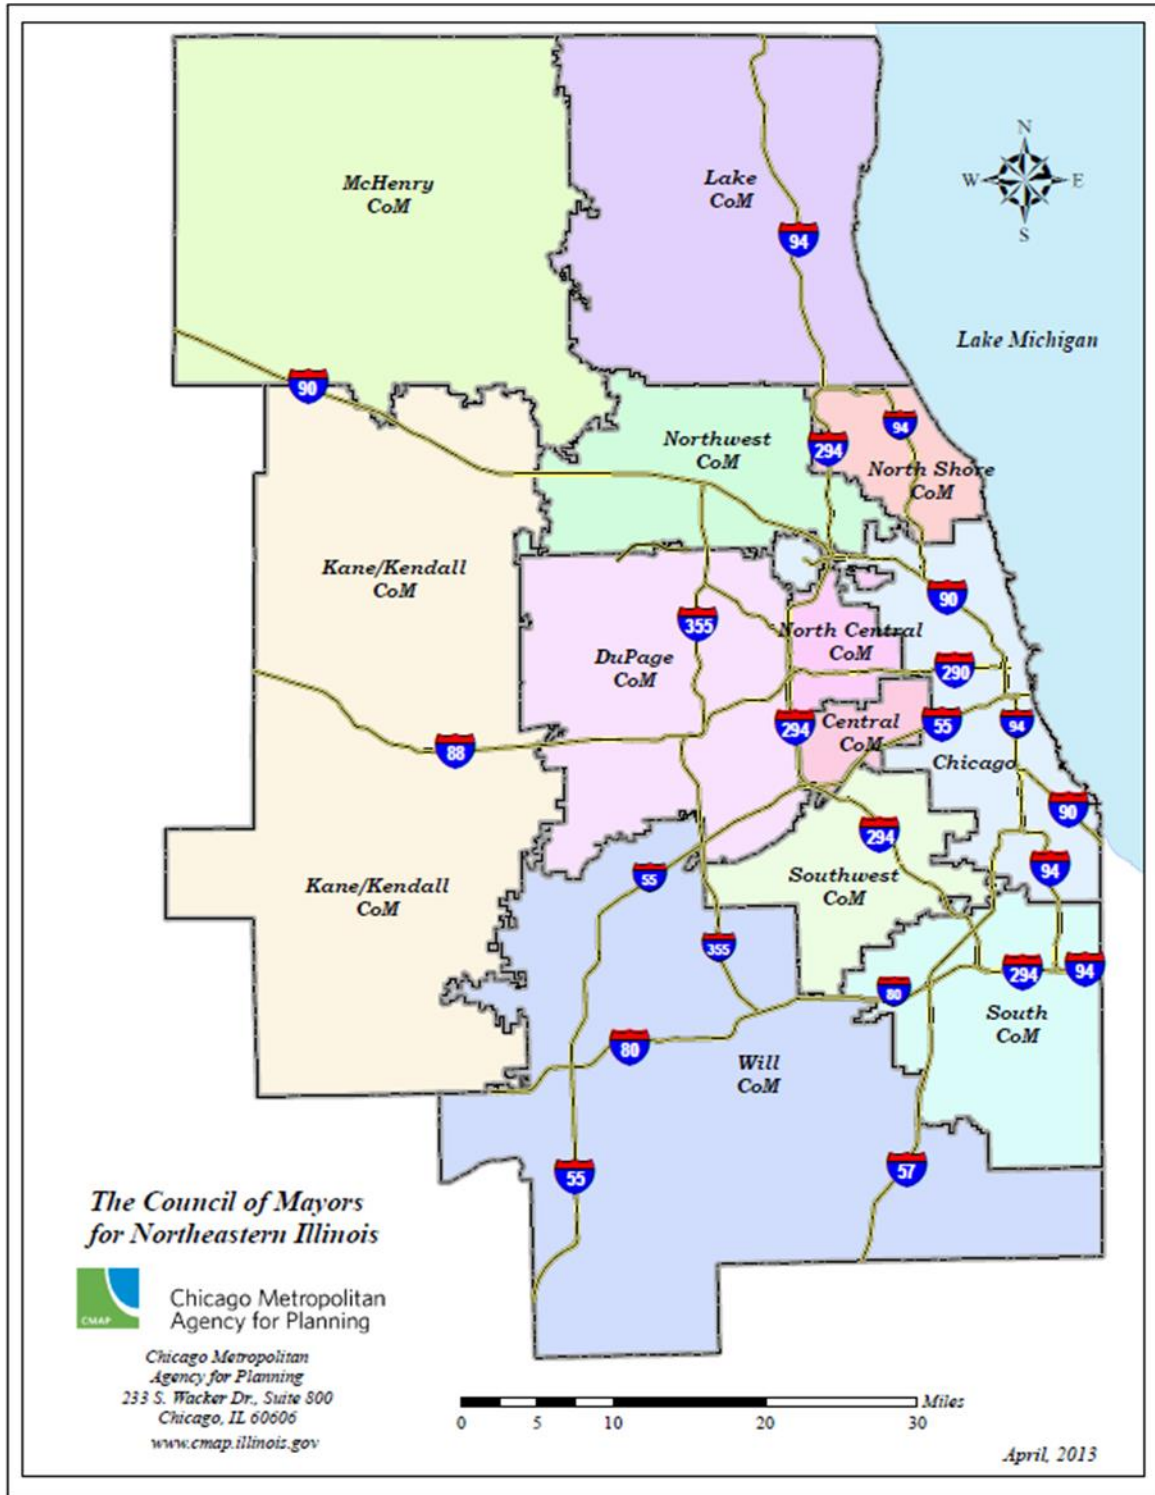

Each TIP ID comprises eight digits. The first two digits represent a Council of Mayors area, transit agency, or regionwide project. The CMAP region has 11 subregional councils (see [Appendix 4](#)), the City of Chicago, and three transit agencies. The next two digits are the year the project was first entered in the TIP database. The last four digits are unique to that project and are assigned in numerical order within a given year. Below is illustration of the components of a TIP ID.

Geographic codes used in the TIP (first two digits of the TIP ID):

- 01 = City of Chicago
- 02 = North Shore Council of Mayors
- 03 = Northwest Council of Mayors
- 04 = North Central Council of Mayors
- 05 = Central Council of Mayors
- 06 = Southwest Council of Mayors
- 07 = South Council of Mayors
- 08 = DuPage Council of Mayors
- 09 = Kane/Kendall Council of Mayors
- 10 = Lake Council of Mayors
- 11 = McHenry Council of Mayors
- 12 = Will Council of Mayors
- 13 = Regional
- 15 = Unincorporated Cook County
- 16 = Chicago Transit Authority
- 17 = Pace
- 18 = Metra

Appendix 4: Council of Mayors map

Appendix 5: Fund sources in the TIP

TIP projects receive federal funding through several sources administered by the FTA and FHWA. Multiple non-federal programs also provide funding for TIP projects. All TIP fund sources used in FFY 2016 are listed below with abbreviations used in the eTIP database and information on the agency that selects and programs projects in the TIP.

Congestion Mitigation & Air Quality Improvement Program (CMAQ)

Federal formula funds for projects that will contribute to improving air quality and reducing congestion in areas that do not meet federal air quality standards. Projects are programmed by the CMAP then implemented by the subregional councils and implementing agencies.

<http://www.cmap.illinois.gov/congestion-mitigation-and-air-quality>

Economic Development (Econ Dev Prgm)

State funds provide assistance in improving highway access to new or expanding industrial, distribution, or tourism developments with a focus on the retention and creation of permanent full-time jobs.

Emergency Repair

Provides funding to assist state and local governments with the expense of repairing serious damage to federal-aid highways after natural disasters or catastrophic failures.

Federal Flexible Match

Matching funds through the Federal Flexible Match Program that allows a variety of public and private contributions to be applied toward the non-federal match (local match).

FTA 5307 Urban Formula

Federal formula funds for capital improvements to transit systems in all urbanized areas of the country. Funds are allocated to the service boards by the RTA and projects are programmed by the service boards.

<https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/FAST%20Act%20Section%205307%20Fact%20Sheet.pdf>

FTA 5309 Core Capacity (5309)

Federal funds for projects that are substantial corridor-based capital investments in existing fixed guideway systems that increase capacity by not less than 10 percent in corridors that are at capacity today or will be in five years.

https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/5309_Capital_Investment_Grant_Fact_Sheet.pdf

FTA Section 5310 – Enhanced Mobility of Seniors and Individuals with Disabilities (5310)

Federal formula funds for the purchase of specially equipped vehicles for the transportation of elderly and mobility-limited persons. Projects are selected and programmed by IDOT's Division of Public and Intermodal Transportation and the RTA.

<https://www.transit.dot.gov/funding/grants/enhanced-mobility-seniors-disabled-fact-sheet-section-5310>

Transit Cooperative Research (FTA 5312 Research)

Provides funding for research that develops near-term, practical solutions such as best practices, transit security guidelines, testing prototypes, and new planning and management tools.

Projects are selected by FTA and programmed by the recipient service boards.

<https://www.transit.dot.gov/funding/grants/public-transportation-innovation-research-fact-sheet-section-5312>

FTA State of Good Repair Grants (5337)

Funding is limited to fixed guideway systems (including rail, bus rapid transit, and passenger ferries) and high intensity bus (high intensity bus refers to buses operating in high occupancy vehicle (HOV) lanes.) Projects are limited to replacement and rehabilitation, or capital projects required to maintain public transportation system in a state of good repair.

https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/5337_State_of_Good_Repair_Fact_Sheet.pdf

FTA Section 5339 – Bus and Bus Facilities (5339)

This capital program provides funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities. Projects are selected and programmed by the service boards. Before MAP-21 this fund source was a discretionary fund for Transit

Alternatives Analysis with projects selected by FTA and programmed by the service boards.

<https://www.transit.dot.gov/sites/fta.dot.gov/files/5339%20Bus%20and%20Bus%20Facilities%20Fact%20Sheet.pdf>

High Priority Projects (HPP)

Federal funds for specific High Priority Projects earmarked by Congress. Projects are selected by Congress and programmed by IDOT.

<https://www.fhwa.dot.gov/federalaid/projects.pdf#hpp>

High Speed Rail

Federal funds for specific projects that will advance the development of High Speed Rail.

Projects are selected by U.S. DOT and programmed by implementing agencies.

Highway Safety Improvement Program

Federal formula funds for highway safety improvement projects on any public road or publicly owned bicycle or pedestrian pathway or trail. Projects are selected and programmed by IDOT.

<http://safety.fhwa.dot.gov/hsip/>

Homeland Security

Federal grant funds that assist in the preparation, prevention, and response to terrorist attacks and other disasters can be used for planning, equipment, training, and exercise needs. Projects are selected by the Department of Homeland Security and programmed by the recipient agency.

IL Funds and IL Funds – Transit

State funds used for highway and/or transit projects.

Illinois Commerce Commission Grade Crossing Protection Fund (ICC- RR Safety)

State funds to assist local highway agencies and railroads with the cost of making safety improvements at public highway-rail crossings on local roads and streets. Projects are selected and programmed by IDOT.

<http://www.icc.illinois.gov/railroad/CrossingSafetyImprovement.aspx>

Illinois Jobs Now

State funds from the 2014 state capital construction program, "Illinois Jobs Now!"

Local Funds

Non-MFT funds used to fund transportation projects by counties, municipalities, townships, etc.

MFT-Local

Funds from taxes on fuel collected by local jurisdictions for the purpose of improving, maintaining, and repairing and constructing highways.

MFT-State Allocation

State funds from taxes on fuel collected by the state and allocated to local jurisdictions for the purpose of improving, maintaining, repairing, and constructing highways.

National Highway Freight Program

Federal formula for states to invest in freight projects on the National Highway Freight Network.

<https://www.transportation.gov/fastact/freight-factsheet>

National Highway Performance Program (NHPP)

Federal formula funds for projects on NHS bridges and roadways. These consist of interstate highways and other principal arterials that support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS. Projects are selected and programmed by IDOT.

<https://www.fhwa.dot.gov/fastact/factsheets/nhppfs.cfm>

National Highway Performance Program – Bridge Penalty

Portion of NHPP funds that must be used to improve bridge conditions. Projects are selected and programmed by IDOT.

National Highway System Program (NHS)

Federal formula funds for projects on the National Highway System. Projects are selected and programmed by IDOT. <http://www.fhwa.dot.gov/safetealu/factsheets/nhs.htm>

Projects of National and Regional Significance

Federal funds designated for the CREATE program and O'Hare western access. Projects are selected by U.S. DOT and programmed by IDOT.

<http://www.fhwa.dot.gov/safetealu/factsheets/natlregl.htm>

Rail-Highway Crossing

Federal formula funds for safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings. Projects are selected and programmed by IDOT.

<http://safety.fhwa.dot.gov/xings/>

Recreational Trails Program (Rec Trails)

Federal formula funds for the development and maintenance of recreational trails and trail-related facilities for both nonmotorized and motorized recreational trail uses. Projects are selected and programmed by IDNR.

https://www.fhwa.dot.gov/environment/recreational_trails/guidance/

RTA Bonds

Revenue bonds issued by the RTA with debt service paid using RTA revenues.

RTA Sales Tax

Funds collected through sales tax in the six-county RTA service area.

RTA Tax – Collar Counties

County transportation enhancement funds collected through the RTA Sales Tax and distributed via formula to DuPage, Kane, Lake, McHenry, and Will counties.

Safe Routes to School

Federal formula funds for projects that enable and encourage primary and secondary school children to walk and bicycle to school. Projects are selected by IDOT and programmed by subregional councils, CMAP, and/or IDOT. New allotments of these funds were discontinued in MAP-21.

<https://www.fhwa.dot.gov/safetealu/factsheets/saferoutes.htm>

Service Board Funds

State formula funds from the Illinois state sales tax collected in the six-county RTA service area distributed to CTA, Pace, and Metra. Programmed by the service boards.

Special Assessments, Tax Increment Financing and Private Sources (Private)

Funds from private entities and/or special assessments over and above the standard property tax rate and/or special taxing districts designed to finance local governments' infrastructure improvements. Projects are selected and programmed by the implementing agency or subregional council.

State Match – Chicago

State funds used to match federal funds for projects in the City of Chicago.

State Matching Assistance

State funds used to assist counties in matching federal funds.

Surface Transportation Block Grant (STP-Locally Prgmd, STP-State Prgmd Urban, STP-State Prgmd Rural, STP-County)

Federal formula funds for federal-aid eligible highways, public bridges, or transit capital projects. Projects selected and programmed by subregional councils (STP-Locally Programmed), local governments (STP-County), and IDOT (STP-State Programmed Rural, STP-State Programmed Urban).

<http://www.cmap.illinois.gov/about/involvement/committees/advisory-committees/council-of-mayors/surface-transportation-program>

Surface Transportation Program (STP) – Bridge (STP-Bridge)

Federal formula funds (funds are an STBG set aside) for the rehabilitation, replacement, preservation, and protection of bridges and tunnels. Projects are selected by IDOT and programmed by subregional councils, counties, and IDOT.

Surface Transportation Program (STP) – Enhancements (STP-Enhancements)

Federal formula funds for projects such as bicycle and pedestrian facilities, historic preservation and others that enhance the transportation system. Projects are selected by IDOT and programmed by subregional councils, CMAP, and IDOT.

Tollway Funds

Funds collected by the Illinois State Toll Highway Authority (Tollway) for exclusive use on the tollway system. Projects are included in the TIP for information only. Projects are selected and programmed by Tollway.

Township Bridge Program (Township Bridge Prgm)

State formula funds distributed to townships and road districts for the construction of bridges.

Transportation Alternatives Program (TAP - State Prgmd, TAP – Locally Prgmd)

Federal formula funds for the development and maintenance of recreational trails and related facilities; projects that provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs; and projects such as landscaping, streetscaping, historic preservation, and others that enhance the transportation system. Project selection is by IDOT (TAP-S) and CMAP (TAP-L). Projects will be programmed by subregional councils, IDOT, and/or CMAP.

<https://www.fhwa.dot.gov/fastact/factsheets/transportationalternativesfs.cfm>

Transportation Development Credits (Trans Credit – Transit)

Toll revenue capital expenditures used as credit toward the non-federal matching share of eligible highway programs and transit projects.

Transportation Infrastructure Finance and Innovation Act (TIFIA)

Not a federal fund source per se, TIFIA is a federal credit assistance to public agencies for transportation projects of national and regional significance. Projects are selected by and programmed by FHWA.

<http://www.fhwa.dot.gov/ipd/tifia/>

Transportation Investment Generating Economic Recovery (TIGER)

Discretionary federal funds to support projects that will have a significant impact on the Nation, a metropolitan area, or a region. Projects are chosen by the FHWA and programmed by Council of Mayors, CDOT, counties, IDOT, or Illinois Tollway.

Truck Access Route Program (Truck Access Rt Prgm)

State discretionary funds for safety improvements at rail-highway crossings.

Appendix 6: Project phases

Phase	Description
Engineering (ENG)	Engineering and or environmental work for transit or other projects that have either combined Phase 1 and Phase 2 engineering, or no distinct Phase 1 and Phase 2 engineering.
Phase 1 Engineering (EI)	Often called preliminary engineering; this is typically the first phase of a project and includes determination of the project purpose and need, assessment of alternatives, determination of environmental impacts, public involvement, and preliminary design and cost estimates for the preferred alternative.
Phase II Engineering (EII)	Preparation of construction plans, specifications, and cost estimates used in preparing final contract documents to be bid on by contractors. Sometimes called the design phase.
Right of Way Acquisition (ROW)	The purchase of right of way and temporary or permanent easements needed for a project.
Construction Engineering (CE)	Engineering and inspection work that occurs as part of the construction phase.
Construction (C)	The construction of a project.
Implementation (IMP)	Implementation of a project. This phase is common with non-infrastructure projects that do not include physically constructed items. Examples are buying equipment or marketing.

Appendix 7: Programmers and implementers

Local government

- City of Chicago
- Central Council of Mayors
- DuPage Mayors and Managers Conference
- Kane/Kendall County Council of Mayors
- Lake County Council of Mayors
- McHenry County Council of Mayors
- North Central Council of Mayors
- North Shore Council of Mayors
- Northwest Council of Mayors
- Park Districts
- South Suburban Mayors and Managers Association
- Southwest Conference of Mayors
- Townships
- Will County Governmental League

Counties

- Cook County
- DeKalb County (partial)
- DuPage County
- Forest Preserve and Conservation Districts
- Grundy County (partial)
- Kane County
- Kendall County
- Lake County
- McHenry County
- Will County

Federal agencies

- Environmental Protection Agency
- Federal Highway Administration
- Federal Transit Administration

Regional agencies

- Chicago Metropolitan Agency for Planning
- Regional Transportation Authority

Operating agencies

Chicago Transit Authority
Class I Railroad companies
Illinois Tollway Highway Authority
Metra
Pace
Private transportation providers

State agencies

Illinois Commerce Commission
Illinois Department of Natural Resources
IDOT District 1 – Bureau of Local Roads & Streets
IDOT District 3 – Bureau of Local Roads & Streets
IDOT District 1 – Division of Highways, Bureau of Programming
IDOT District 3 – Division of Highways, Bureau of Programming
IDOT – Office of Intermodal Project Implementation
IDOT – Office of Planning and Programming
Illinois Environmental Protection Agency

233 South Wacker Drive, Suite 800
Chicago, Illinois 60606
312-454-0400
info@cmap.illinois.gov
www.cmap.illinois.gov

The Chicago Metropolitan Agency for Planning (CMAP) is our region's comprehensive planning organization. The agency and its partners are developing ON TO 2050, a new comprehensive regional plan to help the seven counties and 284 communities of northeastern Illinois implement strategies that address transportation, housing, economic development, open space, the environment, and other quality-of-life issues. See www.cmap.illinois.gov for more information.
