

Get involved

Over the next year, CMAP will publish reports and updates in the following areas as part of the ongoing development of ON TO 2050. There will also be topical forums and workshops to attend throughout the year. Please mark the topics about which you would like to receive more details, and don't forget to include your contact information.

- Demographic trends
- Climate resilience
- Green infrastructure
- Stormwater management/
water resources
- Housing supply and affordability
- Inclusive growth
- Economic clusters and resilience
- Lands in transition
- Infill and transit
oriented development
- Tax policies and land use impacts
- Reinvestment and infill
- Shared services/consolidation
- Community capacity
- Socioeconomic forecast
- Transportation system funding
- Transportation asset conditions
- New transportation technology
- Transit modernization
- Highway operations
- Freight system, planning,
and policy

About CMAP

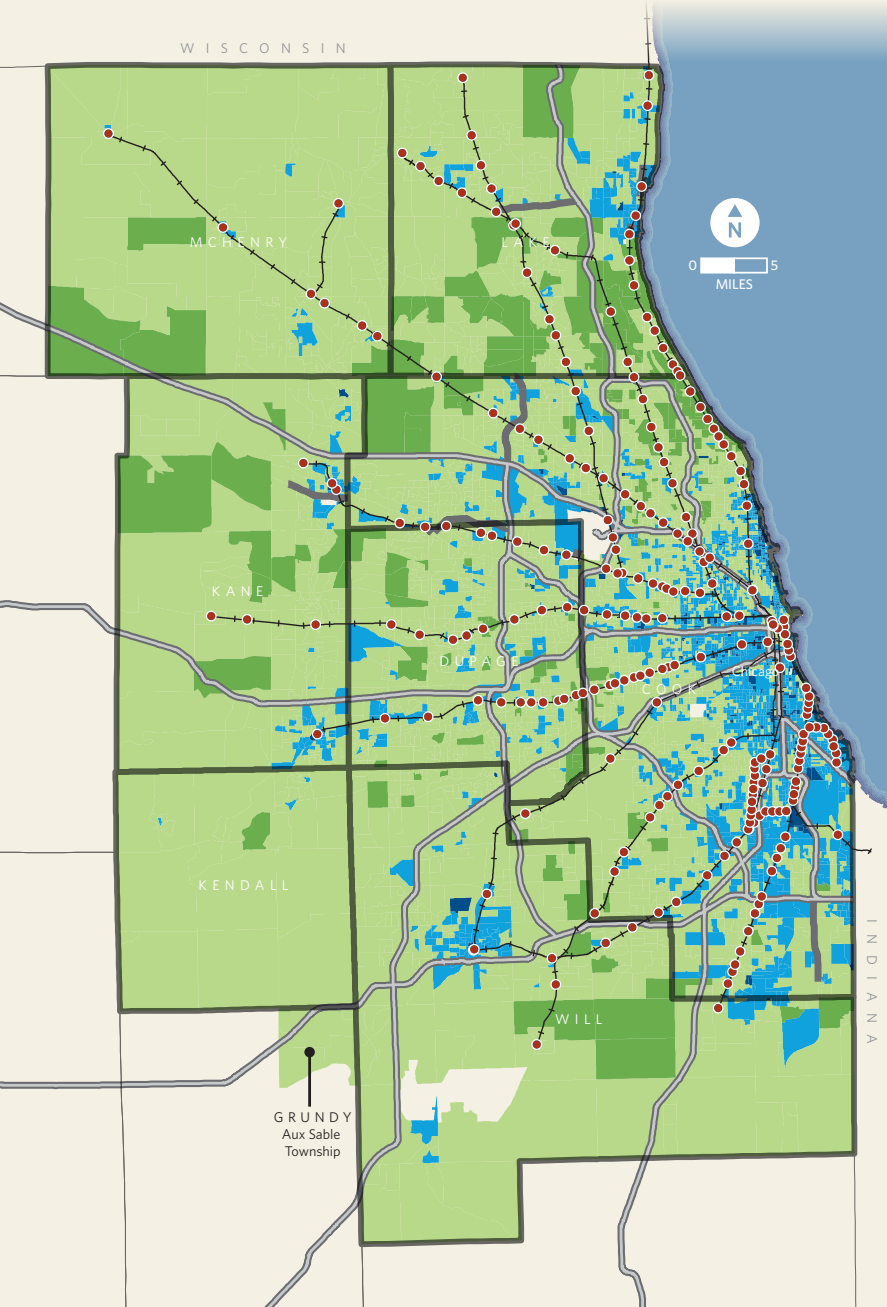

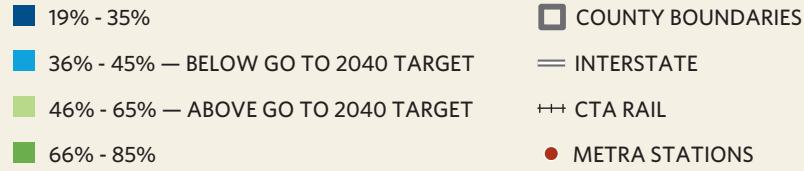

The Chicago Metropolitan Agency for Planning (CMAP) is the region's official comprehensive planning organization. The agency and its partners are developing ON TO 2050, a new comprehensive regional plan to help the seven counties and 284 communities of northeastern Illinois to implement strategies that address transportation, housing, economic development, open space, the environment, and other quality-of-life issues. See www.cmap.illinois.gov for more information.

FY16-0048K

HOUSING SUPPLY AND AFFORDABILITY

Regional typical household spending on housing and transportation as percent of income

A sustainable and successful region requires a range of housing options and improved housing affordability.

CMAP seeks to understand the housing needs of the region and provide effective guidance to increase the range of housing options due to the numerous benefits such diversity provides, including improving housing affordability. This has manifested in *Homes for a Changing Region*, done in partnership with the Metropolitan Planning Council, the Metropolitan Mayors Caucus, and communities throughout metropolitan Chicago.

Working closely with our partners, ON TO 2050 will recommend clear strategies.

Building on the work of many regional stakeholders, CMAP is conducting research that supports, corresponds to, and refines the agency's previous work on housing stock diversity and housing affordability.

This research includes analysis of housing market variation that will allow the next plan to offer more geographic- and community-specific recommendations for improving housing choice and affordability. These strategies will encourage and support more inclusive economic growth for the region, while also making our communities more resilient.

Learn more at www.cmap.illinois.gov/ONTO2050.

Many areas located along major highways or with transit access have lower combined housing and transportation costs and are more affordable for a typical regional household. Areas farther from the center of the region are more likely to have higher combined housing and transportation costs.

HOUSING SUPPLY AND AFFORDABILITY

This is your plan

Help us develop ON TO 2050 by providing your input below.

1 What types of policies or activities are effectively improving housing choice and affordability in your community?

2 Who has the most influence over housing choice and affordability in your community and how can ON TO 2050 better engage them?

3 Please provide any additional comments.
